

MEMORANDUM

TO: South Texas Water Authority Board of Directors  
FROM: Kathleen Lowman, President  
DATE: March 18, 2019  
SUBJECT: Public Hearing Notice and Agenda for the South Texas Water Authority

A public hearing of the STWA Board of Directors is scheduled for:

**Tuesday, March 26, 2019**  
5:30 p.m.  
South Texas Water Authority  
111 Sage Road  
Kingsville, Texas

This meeting notice was posted on STWA's website, www.stwa.org, and on indoor and outdoor bulletin boards at STWA's administrative offices, 2302 East Sage Road, Kingsville, Texas at 3:00 am on March 22, 2019.  
*Francis De Leon*  
Assistant Secretary

to consider and act upon any lawful subject which may come before it, including among others, the following:

Agenda

1. Call to order.
2. Petition for Addition of Certain Lands to the South Texas Water Authority.
  - a. Ryan M. Esquivel and Tabitha F. Esquivel – The north east half of Tract 14, the south west half of Tract 14, all of Tract 15, all of Tract 16 and the north east half of Tract 17 of Cyndie Park Unit 2, Nueces County, Texas
  - b. Roland Gonzalez – Tract Forty-Four (44), Cyndie Park Unit 2, Nueces County, Texas and the adjoining one-half of Tract Forty-Three (43), Cyndie Part Unit 2, Nueces County, Texas
  - c. Patricios Riojas, III and Angel Gonzales Riojas – Tract One (1), Cyndie Park Unit 2, Nueces County, Texas
3. Public Comment
4. Adjournment.

The Board may go into closed session at any time when permitted by Chapter 551, Government Code. Before going into closed session a quorum of the Board must be assembled in the meeting room, the meeting must be convened as an open meeting pursuant to proper notice, and the presiding officer must announce that a closed session will be held and must identify the sections of Chapter 551, Government Code, authorizing the closed session.

MEMORANDUM

TO: South Texas Water Authority Board of Directors  
FROM: Kathleen Lowman, President  
DATE: March 18, 2019  
SUBJECT: Meeting Notice and Agenda for the South Texas Water Authority

A Regular Meeting of the STWA Board of Directors is scheduled for:

**Tuesday, March 26, 2019**  
5:35 p.m.  
South Texas Water Authority  
2302 East Sage Road, Kingsville, Texas

The Board will consider and act upon any lawful subject which may come before it, including among others, the following:

Agenda

1. Call to order.
2. Citizen comments. This is an opportunity for citizens to address the Board of Directors concerning an issue of community interest that is not on the agenda. Comments on the agenda items must be made when the agenda item comes before the Board. The President may place a time limit on all comments. The response of the Board to any comment under this heading is limited to making a statement of specific factual information in response to the inquiry, or, reciting existing policy in response to the inquiry. Any deliberation of the issue is limited to a proposal to place it on the agenda for a later meeting.
3. New Board members' oaths of office.
4. Approval of Minutes. (Attachment 1)
5. Treasurer's Report/Payment of Bills. (Attachment 2)
6. **Resolution 19-12.** Resolution approving Annexation of Certain Lands to the South Texas Water Authority (Ryan M. Esquivel and Tabitha F. Esquivel – The north east half of Tract 14, the south west half of Tract 14, all of Tract 15, all of Tract 16 and the north east half of Tract 17 of Cyndie Park Unit 2, Nueces County, Texas). (Attachment 3)
7. **Resolution 19-13.** Resolution approving Annexation of Certain Lands to the South Texas Water Authority (Roland Gonzalez –Tract Forty-Four (44), Cyndie Park Unit 2, Nueces County, Texas and the adjoining one-half of Tract Forty-Three (43), Cyndie Part Unit 2, Nueces County, Texas). (Attachment 4)

8. **Resolution 19-14.** Resolution approving Annexation of Certain Lands to the South Texas Water Authority (Patricios Riojas, III and Angel Gonzales Riojas –Tract One (1), Cyndie Park Unit 2, Nueces County, Texas). (Attachment 5)
9. Tax Increment Reinvestment Zone 1 – Historic Downtown Kingsville, Texas. (Attachment 6)
10. License Agreement with City of Bishop for Pump Station Facilities. (Attachment 7)
11. Water Supply Contract with City of Driscoll. (Attachment 8)
12. Bids for construction of equipment barn. (Attachment 9)
13. **Resolution 19-07.** Resolution awarding the bid for construction of an equipment barn. (Attachment 10)
14. Chloramine Booster Station – Kingsville Pump Station for Ricardo WSC 12-inch waterline. (Attachment 11)
15. Cathodic Protection Report and zinc anode purchase for STWA 42-inch waterline cathodic protection project. (Attachment 12)
16. **Resolution 19-15.** Award of bid for the purchase of anodes. (Attachment 13)
17. Declaration of surplus property, authorization to approve sale of surplus property to the highest bidder, declaration of unsold items as salvage property and authorization to dispose of salvage items. (Attachment 14)
18. Con Mims response to Resolution 19-10. (Attachment 15)
19. TAMUK request for funding in the amount of \$10,533 for a study to determine the Effectiveness of a Metal Centered Nanotube Network on Water Disinfection and Desalination. (Attachment 16)
20. Petitions for Addition of Certain Lands to the South Texas Water Authority and setting of public hearing date, time and place. (Attachment 17)
  - a. Crystal Lynn Barrera – Cyndie Park Unit 2, Tract Twenty-Seven (27) and Southwest Quarter (SW/4) of Tract Twenty-eight (28), Nueces County, Texas
  - b. Robert E. Burleson, III. – Tract 45, Cyndie Park Unit 2, Nueces County, Texas
  - c. Roland Bayardo and San Juana Bayardo – Tract Twenty-Two (22) and the adjoining one-half (1/2) of Tract Twenty-Three (23), Cyndie Park Unit 2, Nueces County, Texas
  - d. Richard L. Burleson – The Southwest 23.51 feet of Lot 9, all of lot 10 and the adjoining Northeast ½ of Lot 11, Cyndie Park Unit 2, Nueces County, Texas
  - e. Jose Ovidio Guzman, Jr. – Tract Two (2), Cyndie Park Unit 2, Nueces County, Texas

21. **Resolution 19-16.** Resolution of determination of validity of Petition for Addition of Certain Lands to the South Texas Water Authority and setting the date, time and place for a public hearing and authorizing publication of public hearing notice. (Crystal Lynn Barrera) (Attachment 18)
22. **Resolution 19-17.** Resolution of determination of validity of Petition for Addition of Certain Lands to the South Texas Water Authority and setting the date, time and place for a public hearing and authorizing publication of public hearing notice. (Robert E. Burleson, III.) (Attachment 19)
23. **Resolution 19-18.** Resolution of determination of validity of Petition for Addition of Certain Lands to the South Texas Water Authority and setting the date, time and place for a public hearing and authorizing publication of public hearing notice. (Roland Bayardo and San Juana Bayardo) (Attachment 20)
24. **Resolution 19-19.** Resolution of determination of validity of Petition for Addition of Certain Lands to the South Texas Water Authority and setting the date, time and place for a public hearing and authorizing publication of public hearing notice. (Richard L. Burleson) (Attachment 21)
25. **Resolution 19-20.** Resolution of determination of validity of Petition for Addition of Certain Lands to the South Texas Water Authority and setting the date, time and place for a public hearing and authorizing publication of public hearing notice. (Jose Ovidio Guzman, Jr.) (Attachment 22)
26. Adjournment.

The Board may go into closed session at any time when permitted by Chapter 551, Government Code. Before going into closed session a quorum of the Board must be assembled in the meeting room, the meeting must be convened as an open meeting pursuant to proper notice, and the presiding officer must announce that a closed session will be held and must identify the sections of Chapter 551, Government Code, authorizing the closed session.

Approval of Minutes

SOUTH TEXAS WATER AUTHORITY  
Regular Board of Directors Meeting  
February 26, 2019  
Minutes

Board Members Present:

Kathleen Lowman  
Dr. Albert Ruiz  
Rudy Galvan  
Patsy Rodgers  
Filiberto Treviño  
Brandon Barrera

Board Members Absent:

Lupita Perez  
Steven Vaughn

Staff Present:

Carola G. Serrato  
Frances De Leon  
Jacob Hinojosa  
Armando Yruegas

Guests Present:

None

1. Call to Order.

Ms. Kathleen Lowman, Board President, called the Regular Meeting of the STWA Board of Directors to order at 5:30 p.m. A quorum was present.

2. Citizen Comments.

Ms. Lowman opened the floor to citizen's comments. No citizen comments were made.

3. Approval of Minutes.

Ms. Rodgers made a motion to approve the minutes of the January 8, 2019 Special Meeting and the January 22, 2019 Regular Meeting as presented. Mr. Treviño seconded. The motion passed by unanimous vote.

4. Treasurer's Report/Payment of Bills.

The following reports were presented for the Board's consideration:

Treasurer's Report for period ending January 31, 2019  
Revenue Fund Income Statement for period ending January 31, 2019  
Tax Fund Income Statement for period ending January 31, 2019  
Special Services Income Statement for period ending January 31, 2019  
STWA Revenue Fund Balance Sheet – January 31, 2019  
STWA Revenue Fund GL Account Summary Report as of January 31, 2019  
STWA Debt Service Fund Income Statement for period ending January 31, 2019  
STWA Debt Service Fund Balance Sheet January 31, 2019  
STWA Debt Service Fund GL Account Summary Report as of January 31, 2019  
STWA Capital Projects Fund Income Statement for period ending January 31, 2019

Cathodic Protection Expenses Breakdown through January 2019  
STWA Capital Projects Fund Balance Sheet – January 31, 2019  
STWA Capital Projects Fund GL Account Summary Report as of January 31, 2019  
Anticipated vs. Actual Water Rate Charged  
Maintenance & Technical Report from O&M Supervisor – January and February 2019  
Cathodic Protection Update

The following outstanding invoices were presented for Board approval:

• John Womack & Co., P. C.	\$ 3,945.00
• Mercer Controls, Inc.	\$ 6,895.00
• Kevin Kieschnick-NC Tax Assessor	\$ 14,405.75
• Willatt & Flickinger, Attorneys at Law	\$ 2,562.90
• City of Corpus Christi	\$ 81,402.45
• Mercer Controls, Inc.	\$ 1,950.00
• Mercer Controls, Inc.	\$ 3,648.00
• Mercer Controls, Inc.	\$ 580.00
• Kevin Kieschnick-NC Tax Assessor	\$ 4,297.76

Copies of the last four invoices on this list were distributed at the meeting. A motion was made by Mr. Galvan to approve the Treasurer's Reports and payment of the bills as presented. Mr. Treviño seconded. The motion carried.

5. Tax Increment Reinvestment Zone 1 – Historic Downtown Kingsville, Texas.

Ms. Serrato stated that Kleberg County has not yet discussed participation in the Kingsville Tax Increment Reinvestment Zone. She reminded the Board that STWA's contribution into the City's fund if made at a 100% level and over a 30-year period would total just under \$9,600. If the Board approves participation in the TIRZ, STWA will need to establish the required percentage level and whether it will be based on taxes assessed or taxes collected. The Board took no action on this matter.

6. Update on TCEQ Enforcement Action and State Office of Administrative Hearings.

Ms. Serrato informed the Board that a letter was received from TCEQ on February 4<sup>th</sup> confirming that STWA has complied with all of the Order provisions. Staff will continue following the Monitoring Plan, Nitrification Action Plan and Sample Siting Plan and submitting the Disinfectant Level Quarterly Operating Report. A TCEQ Investigation (Inspection) is expected to occur during 2019. She had nothing further to report.

7. Water Supply Contract with the City of Bishop.

Ms. Serrato stated that after the Board approved the revised Wholesale Water Supply Contract with the City of Bishop contingent on the City approving the License Agreement for the use of the Bishop East Pump Station real estate property, the City approved the Wholesale Water Supply Contract but tabled action on the License Agreement. Therefore, the contract is not in

effect. The City has not purchased water since early December and has been relying on their water well, but she noted that a contractor who is setting up service with Nueces Water Supply Corporation mentioned during the process that they will be drilling wells in the Bishop area for water to be used for dust control and construction of highway improvements. She also mentioned to the Board that she received a phone call from someone who called the City of Bishop about a skin condition and was told by the City that she should call STWA. Ms. Serrato explained to the caller that Bishop has not been purchasing water from STWA since December and the caller told her that her condition had started in December. Ms. Serrato had nothing further to report.

8. License Agreement with City of Bishop for Pump Station Facilities.

Ms. Serrato distributed copies of email exchanges with the Bishop City Secretary Cynthia Contreras and reported that the City did not approve the License Agreement at their January 23<sup>rd</sup> meeting because the Council did not accept the STWA's proposed changes. She informed Ms. Contreras that without specific details on the Council's objections to the proposed changes on the License Agreement, the STWA Board would not be able to provide a response. Ms. Serrato informed the Board that the City is objecting to changes in sections IV and IX but does not have specific details. She recommended that the Board await further information from the City. No action was taken by the Board.

9. Purchase of real property at site of City of Bishop Pump Station Facilities.

Ms. Serrato stated there has been no feedback from the City of Bishop.

10. Water Supply Contract with the City of Driscoll.

Ms. Serrato said that the City of Driscoll is waiting on an election to fill the vacancy on the city council and added that she has received no response from the City of Driscoll.

11. Interlocal Participation Agreement for the GoodBuy Purchasing Cooperative.

Ms. Serrato presented an Interlocal Participation Agreement for the GoodBuy Purchasing Cooperative. She said this cooperative is similar to BuyBoard and provides more options for finding competitive pricing. There is no cost to become a member. She requested authorization to execute the Interlocal Agreement and recommended approval of Resolution 19-04.

12. Resolution 19-04. Shared Service Arrangement for Participation in the GoodBuy Purchasing Cooperative.

Mr. Treviño made a motion to authorize staff to execute the Interlocal Agreement and to adopt Resolution 19-04. Ms. Rodgers seconded and the motion passed by unanimous vote.

13. Bids for the purchase of one trailer for hauling trackhoe/excavator.

Ms. Serrato reported that as authorized by the Board, quotes were solicited for purchase of a heavy-duty equipment trailer capable of hauling the new trackhoe. Four quotes were received

ranging from \$16,340 to \$20,608, all rated with dual axles of 15,000 lbs. She presented a memo from CP Technician Armando Yruegas recommending award of the bid to Hallmark Trailer Sales in the amount of \$16,340 with a 3 to 4-week delivery period. Mr. Galvan commented that he had made inquiries about 30,000 lb. trailers and was informed that they are not bought as often due to the required federal permits or taxes. Mr. Yruegas responded that there is a one-time fee paid at the time of purchase. The Board decided to discuss the bids for a haul truck before taking action on resolution 19-05.

14. Resolution 19-05. Resolution awarding the bid for the purchase of one trailer for hauling trackhoe/excavator.

After reviewing the bids, Mr. Galvan moved to award the bid for purchase of the trailer to Hallmark Trailer Sales for \$16,340. Dr. Ruiz seconded. All voted in favor.

15. Bids for the purchase of one truck for hauling trackhoe/excavator.

Ms. Serrato stated that three bids were received from Ford dealerships and one was received from a Dodge dealership but was considered incomplete because it did not include details on the capacity of the truck. The Ford bids were from Caldwell Country Ford for \$50,271, Silsbee Ford for \$51,515.25 and Rush Truck Center for \$53,748.30. The bids are on the same model truck under the same specifications. She recommended purchasing the truck from Caldwell Country Ford in the amount of \$51,271. Mr. Galvan stated that he had inquired about bids for this type of truck and was informed that trucks over the size of a one-ton do not come with a bed which can run from \$5,500 to \$9,000 but added that as long as the bed is included in the bid, he is in agreement with Ms. Serrato's recommendation.

16. Resolution 19-06. Resolution awarding the bid for the purchase of one haul truck.

Mr. Galvan made a motion to award the bid for the purchase of the haul truck to Caldwell Country Ford in the amount of \$50,271. Mr. Barrera seconded. All voted in favor. Ms. Serrato also recommended using general funds to purchase the truck rather than bond funds. She explained that if purchased with bond funds, the truck will need to be purchased back at the blue book value at the time it is returned to regular use. It would not be depreciated, it would be valued based on blue book value. The board agreed to purchase the vehicle with general funds.

17. Bids for construction of an equipment barn.

Ms. Serrato stated that the FY 2019 budget included \$50,000 for the equipment barn. Mr. Yruegas received five quotes with the least expensive being William Pope Construction at a cost of \$44,600. She added that this company performed the work on the Kingsville Pump Station after the first contractor was not able to do the job and was able to complete it satisfactorily at \$15,000 less than quoted by the original contractor. The bids were requested on an equipment barn designed to have three 20-foot bays on a concrete slab. Mr. Galvan asked about only covering two sides in order to make it a drive thru barn for quicker loading and unloading. He also suggested buying the material and having field staff build it. Ms. Serrato responded that constructing the building in-house was considered but field staff is not comfortable with constructing the building. Mr. Galvan presented quotes on material for various sized buildings

ranging in cost from \$16,932 to \$40,776 but without a concrete slab. Ms. Serrato responded that the presented quotes include a concrete slab and that measurements would be needed to make sure enough space is available without interfering with the location of existing waterlines. She added that a drive thru may require moving waterlines or taking out the existing shed and checking to see if a tie in to the concrete is possible. She also stated that it is very likely that there could be issues with workers compensation coverage since the field personnel are rated for waterworks and not construction work. She also recommended against breaking up the project by purchasing the materials and then bidding out construction because it can give the impression that STWA is not following the regulations for advertising and bidding out projects.

Other members voiced their opinions about constructing a building that would be large enough to accommodate all current equipment and future needs. Ms. Serrato responded that the design would be discussed further with field personnel and she would present additional options to the Board. Dr. Ruiz also stated that he wanted to make sure field staff voice their opinion on what is needed and if it turns out to be more than what is budgeted, the money should be found for it so that they are comfortable with the final outcome. Ms. Serrato responded that she has been asking for field personnel's input from the onset of the project.

18. **Resolution 19-07. Resolution awarding the bid for construction of an equipment barn.**

No action was taken on Resolution 19-07.

19. **Petition for Addition of Certain Lands to the South Texas Water Authority and setting of public hearing date, time and place (Ryan M. Esquivel and Tabitha F. Esquivel – The north east half of Tract 14, the south west half of Tract 14, all of Tract 15, all of Tract 16 and the north east half of Tract 17 of Cyndie Park Unit 2, Nueces County, Texas).**

Although this annexation petition was presented at the January 22<sup>nd</sup> Board meeting, it was presented again because the wrong wording was used in the resolution listed on the January 22<sup>nd</sup> agenda. Ms. Serrato explained that Ryan M. Esquivel and Tabitha F. Esquivel approached the Nueces Water Supply Corporation requesting service outside of the Authority's district boundaries as a result of a project to extend water service to the Cyndie Park area. As in the past, the process has been for the property owner to request annexation into the district. In this manner, all of NWSC's retail customers are paying the same rates including being taxed by STWA. NWSC does not have out of district rates. If Resolution 19-08 is approved as presented, the Public Hearing will be held on March 26, 2019 at 5:30 p.m. at the STWA conference room.

20. **Resolution 19-08. Resolution of determination of validity of Petition for Addition of Certain Lands to the South Texas Water Authority and setting the date, time and place for a public hearing and authorizing publication of public hearing notice.**

Ms. Rodgers made a motion to adopt Resolution 19-08 setting the Public Hearing on March 26, 2019 at 5:30 p.m. at the STWA conference room and authorizing publication of the public hearing notice. The motion was seconded by Mr. Treviño and passed unanimously.

21. Petition for Addition of Certain Lands to the South Texas Water Authority and setting of public hearing date, time and place (Roland Gonzalez – Tract Forty-Four (44), Cyndie Park Unit 2, Nueces County, Texas and the adjoining one-half of Tract Forty-Three (43), Cyndie Park Unit 2, Nueces County, Texas.

Ms. Serrato stated that Roland Gonzalez has approached the Nueces Water Supply Corporation requesting service outside of the Authority's district boundaries as a result of a project to extend water service to the Cyndie Park area. As in the past, the process has been for the property owner to request annexation into the district. In this manner, all of NWSC's retail customers are paying the same rates including being taxed by STWA. NWSC does not have out of district rates. Approval of Resolution 19-09 will set the Public Hearing to be held on March 26, 2019 at 5:30 p.m. at the STWA conference room.

22. Resolution 19-09. Resolution of determination of validity of Petition for Addition of Certain Lands to the South Texas Water Authority and setting the date, time and place for a public hearing and authorizing publication of public hearing notice.

Ms. Rodgers made a motion to adopt Resolution 19-09 setting the Public Hearing on March 26, 2019 at 5:30 p.m. at the STWA conference room and authorizing publication of the public hearing notice. The motion was seconded by Mr. Treviño and passed unanimously.

23. Chloramine Booster Station – Kingsville Pump Station for Ricardo WSC 12-inch waterline.

Ms. Serrato stated that TCEQ personnel recently conducted a visit regarding disinfection byproducts and operation of the Ricardo and Nueces Water Supply Corporation disinfection systems. During that visit, they mentioned that there should be a booster station for the Ricardo 12" waterline. She explained that there is an issue with moving water down the 42" waterline and having a residual when it arrives to Ricardo's line. She added that STWA has the responsibility to deliver water with the required residual. She asked authorization to begin researching the process of checking with TCEQ, engineers, legal counsel and vendors about the installation requirements, estimated cost and bidding requirements. She said the expense would most likely fall into the FY 2020 budget. The Board agreed by consensus to have Ms. Serrato begin researching the process for a chloramine booster station as a STWA project.

24. Resolution 19-10. A resolution honoring Con Mims, Nueces River Authority Executive Director, for his service in the protection and development of water resources for the Coastal Bend and the State of Texas.

Ms. Serrato recommended adoption of Resolution 19-10 in honor of Con Mims, Nueces River Authority Executive Director who will be retiring. Dr. Ruiz made a motion to adopt Resolution 19-10. The motion was seconded by Ms. Rodgers and passed by unanimous vote.

25. Interlocal Agreement between Harris County Department of Education and South Texas Water Authority for Choice Partners Cooperative.

Ms. Serrato presented an Interlocal Agreement with Harris County Department of Education for participation in the Choice Partners Cooperative. She said this cooperative is similar to BuyBoard, HGAC and GoodBuy cooperatives and provides more options for competitive pricing. Choice Partners also includes vendors outside of Texas. There is no cost to become a member. Ms. Serrato requested authorization to execute the Interlocal Agreement. Mr. Galvan made a motion to authorize execution of the Interlocal Agreement with Harris County Department of Education for participation in the Choice Partners Cooperative. Mr. Treviño seconded. All voted in favor.

26. Petition for Addition of Certain Lands to the South Texas Water Authority and setting of public hearing date, time and place (Patricios Riojas, III and Angel Gonzales Riojas -- Tract One (1), Cyndie Park Unit 2, Nueces County, Texas.

Ms. Serrato presented an Annexation Petition from Patricios Riojas, III and Angel Gonzales Riojas who have approached the Nueces Water Supply Corporation requesting service outside of the Authority's district boundaries as a result of a project to extend water service to the Cyndie Park area. The same process will be followed as other property owners to requesting annexation into the district. Since NWSC does not have out of district rates, the process assures that all of NWSC's retail customers are paying the same rates including being taxed by STWA. Approval of Resolution 19-11 will set the Public Hearing on March 26, 2019 at 5:30 p.m. at the STWA conference room.

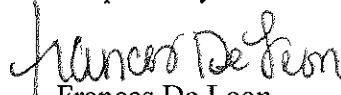

27. Resolution 19-11. Resolution of determination of validity of Petition for Addition of Certain Lands to the South Texas Water Authority and setting the date, time and place for a public hearing and authorizing publication of public hearing notice.

Ms. Rodgers made a motion to adopt Resolution 19-11 setting the Public Hearing on March 26, 2019 at 5:30 p.m. at the STWA conference room and authorizing publication of the public hearing notice. The motion was seconded by Mr. Treviño and passed unanimously.

28. Adjournment.

With no further business to discuss, Ms. Lowman adjourned the meeting at 6:42 p.m.

Respectfully submitted,

  
Frances De Leon  
Assistant Secretary

## INTER-OFFICE MEMO

TO: Carola G. Serrato, Executive Director  
FROM: Jacob Hinojosa, O&M Supervisor  
DATE: March 21, 2019  
RE: Maintenance & Technical Report

During the week of February 11, 2019, the following work was completed.

- Safety Meeting for all Field Techs.
- Exercised generators, downloaded GPS reports and performed line locates.
- Took daily residuals for the Driscoll Booster Station project. (Booster Station, CR 16 & KI MR)
- Took Unit #2 to get an oil change.
- Performed the colorimeter verification for all DR900's.
- Picked up new truck from C&S plating (the company now being used – Trucker's Equipment Closed).
- Employee took a CDL exam.
- Had FMT training with TCEQ reps.
- Took Bac-T water samples.
- Took NAP samples.
- Adjusted SCADA and pump set points for Banquete Pump Station due to tank cleaning that was going to be done by NCWC&ID #5.

During the week of February 18, 2019, the following work was completed.

- Safety Meeting for all Field Techs.
- Exercised generators, downloaded GPS reports and performed line locates.
- Took daily residuals for the Driscoll Booster Station project. (Booster Station, CR 16 & KI MR)
- Took NAP samples.
- Took nitrate/nitrite samples.
- Dropped off Unit #7 at Ford dealership.
- Repaired Bishop East MOV.
- Sprayed weed killer at the pump stations.
- Took Bac-T water samples.
- Put SCADA and pump set points back to normal at Banquete Pump Station.
- Repaired leak in spur line by CR 93 and CR 38.

During the week of February 25, 2019, the following work was completed.

- Safety Meeting for all Field Techs.
- Exercised generators, downloaded GPS reports and performed line locates.
- Took daily residuals for the Driscoll Booster Station project. (Booster Station, CR 16 & KI MR)
- Took NAP samples.
- Ran pumps on Spur line to help GEO Detention Center fill their GST's.
- Moved track hoe for CP crew to a different location.
- Took Unit #1 to get sensor repaired for traction control.
- Delivered 1-ton cylinder of chlorine for Driscoll Booster.
- Gross Solutions came to replace SCADA radio at Banquete Pump Station.

During the week of March 4, 2019, the following work was completed.

- Safety Meeting for all Field Techs.
- Exercised generators, downloaded GPS reports and performed line locates.
- Took daily residuals for the Driscoll Booster Station project. (Booster Station, CR 16 & KI MR)
- Took NAP samples.
- Installed new UPS backup for Banquete SCADA.
- Took Unit #5 for service.
- Mowed grass around office.

During the week of March 11, 2019, the following work was completed.

- Safety Meeting for all Field Techs.
- Exercised generators, downloaded GPS reports and performed line locates.
- Took daily residuals for the Driscoll Booster Station project. (Booster Station, CR 16 & KI MR)
- Took NAP samples.
- Mowed grass at Kingsville office.
- Took Unit #7 to get new tires.
- Took water samples.
- Cleaned out the gutters for the office building.

ATTACHMENT 3

Resolution 19-12  
Annexation Petition – Esquivel

Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 15, 2019  
Re: Annexation Petition—Ryan M. Esquivel and Tabitha F. Esquivel, Cyndie Park Unit 2, north east half of Tract 14, south west half of Tract 14, all of Tract 15, all of Tract 16 and north east half of Tract 17, Nueces County, Texas

Background:

As reviewed last month, on occasion a property owner living outside STWA's district will request retail water service from the Nueces Water Supply Corporation (NWSC). In the past, the property owner has requested annexation into STWA's district in order to pay the same cost for service as other NWSC retail customers including any property taxes to STWA. Last month, the STWA Board took action to set the date, time and place for the necessary public hearing on the annexation. This public hearing will occur immediately prior to the Board meeting. Staff does not anticipate any public attendance on the matter unless the landowners decide to attend.

Analysis:

Annexing the property into STWA's district results in the NWSC retail customer paying the same inside district rates for service as other NWSC customers. Without the annexation, an outside district customer would pay NWSC monthly minimums and cost per 1000g but would not pay the STWA taxes paid by other NWSC retail customers. With the adoption of the enclosed Resolution 19-12, STWA staff will contact the Nueces County Appraisal District and the property is added to STWA's rolls.

This annexation is part of the long-term project spear-headed by Nueces County and their Grant Administration office that included grant funds from the Texas Department of Agriculture and Texas Water Development Board for a planning study, distribution lines in the Cyndie Park Subdivision, a transmission line extending from NWSC's closest 6" line and the soon to be constructed new pump station immediately north of the existing Banquete Pump Station.

Staff Recommendation:

Adopt Resolution 19-12.

Board Action:

Determine whether to adopt Resolution 19-12.

Summarization:

Annexation of this property means that this customer will be subject to the same cost as other NWSC retail customers including NWSC retail water rates and STWA property taxes.

public notice of the time, place, and purpose of said Meeting was given all as required by Chapter 551, Texas Government Code.

SIGNED AND SEALED the 26<sup>th</sup> day March, 2019.

NUECES WATER SUPPLY CORPORATION

PETITION FOR ADDITION OF CERTAIN LANDS TO THE SOUTH TEXAS WATER AUTHORITY

STATE OF TEXAS :
COUNTY OF NUECES :

TO THE BOARD OF DIRECTORS OF THE SOUTH TEXAS WATER AUTHORITY:

The undersigned (herein called "Petitioner"), holder of title to the territory described by metes and bounds in Exhibit "A" which is attached hereto and incorporated herein for all purposes, being all of the residents and landowners of such territory, as shown by the tax rolls of Nueces County, Texas, and acting pursuant to the provisions of Section 11006.052, Special District Local Laws Code, respectfully petitions the Board of Directors of South Texas Water Authority that the territory described by metes and bounds in Exhibit "A" be added to and become a part of the established South Texas Water Authority, and in support of this petition would show as follows:

I.

Fee simple title and full ownership of the aforesaid territory, which lies wholly within Nueces County, Texas, is vested in Petitioner.

II.

The addition of said territory to South Texas Water Authority is feasible and practical, would be to the best interest both to the territory and to the Authority and would benefit said territory.

III.

The Authority will be able to supply water, or have water supplied, to the added territory.

IV.

This petition shall constitute an election on the part of the Petitioner, its successors and assigns, for the aforesaid land and any improvements which may be constructed thereon to become liable for all present and future debts of the Authority in the same manner and to the same extent as other lands and improvements in the Authority are liable for the Authority's debts.

V.

Petitioner hereby authorizes the Board of Directors of the Authority to levy taxes and set rates sufficient to pay their share of the aforementioned outstanding indebtedness.

WHEREFORE, Petitioner prays that this petition be properly filed, as provided by law; that the Board of Directors of South Texas Water Authority hear and consider the petition in keeping with the provisions of Section 11006.052, Special District Local Laws Code; and that this petition in all things be granted and that the territory described in Exhibit "A" be added to and become a part of the established South Texas Water Authority; that after this petition is granted the Board's order thereon be filed of record and be recorded in the Deed Records of Nueces County, Texas; and that the area described in Exhibit "A" be thereafter a component part of South Texas Water Authority.

SOUTH TEXAS WATER AUTHORITY

Resolution 19-14

THE STATE OF TEXAS §  
COUNTIES OF KLEBERG AND NUECES §  
SOUTH TEXAS WATER AUTHORITY §

WHEREAS, the Board of Directors conducted a hearing on this date in reference to the annexation of the territory described in Exhibit A attached hereto; and

WHEREAS, it was deemed advisable by the Board to approve the annexation of such territory to the Authority; and

WHEREAS, it is officially found and determined: that a case of emergency or urgent public necessity exists which required the holding of the meeting at which this Resolution was adopted and that said meeting was open to the public, and public notice of the time, place and purpose of said meeting was given, all as required by Chapter 551, Texas Government Code.

THEREFORE, BE IT RESOLVED BY THE BOARD OF DIRECTORS OF SOUTH TEXAS WATER AUTHORITY:

1. That the annexation of the territory described in Exhibit A is hereby approved by this Board, and it is hereby found that there will be benefit to the territory as amended.
2. That pursuant to Article 7, Chapter 436, Acts of the 66th Legislature, Regular Session, 1979, no election is required to approve the annexation as the petition was signed by all residents and landowners of the annexed territory.

ATTACHMENT 6

Kingsville TIRZ

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 15, 2019  
Re: Kingsville Tax Increment Reinvestment Zone (TIRZ)

### Background:

During the February meeting, the Board tabled taking any action on the Kingsville TIRZ. As before, the Board inquired whether Kleberg County had taken action on the TIRZ. Staff indicated that the information would be requested. Enclosed is my most recent email to Mr. Tom Ginter, Kingsville Director of Planning and Development Services. As reported in a recent weekly update, the Kleberg County Commissioners met recently and discussed the matter. A motion was made, seconded and passed to request a workshop with the City on the matter and invite STWA to attend. Additional information has not been received. The next Commissioners Court meeting should occur on March 25<sup>th</sup>.

### Analysis:

To my knowledge, the previous details on the TIRZ have not changed. The area encompasses about 27 city blocks in the City's downtown area. The TIRZ does not create an additional tax, rather the incremental amount is set aside in a special fund. STWA's estimated contribution into the special fund if approved at a 100% level over the 30-year period would be slightly less than \$9,600. If the Board voted to participate, STWA would select the percentage to be channeled to the special fund. In addition, the Board would decide whether to provide funds based on the taxes assessed *or* on the taxes collected.

### Staff Recommendation:

Await information on a workshop between the City and the County in order to gather additional information.

### Board Action:

Provide feedback to staff.

### Summarization:

Staff's assessment of the benefit to South Texas Water Authority is unchanged from last month. The improvements to the Kingsville Downtown area are intended to spur other growth thereby increasing the overall tax base.

Tom,

Just a brief note to let you know the STWA tabled the TIRZ agenda item. They are still interested in knowing about any action the Kleberg County Commissioners Court takes on the matter.

Have a Good Weekend,

Carola

Yes, this is helpful.

I am wondering also whether the Kleberg County Commissioners Court has considered the matter and, if so, did they take any action?

Thanks,  
Carola

**Subject:** questions on TIF

Carola:

I have had previous experience with them when I was the city manager in Beeville but to be sure I have also called the Nueces County Tax Assessor-Collector to answer your questions on the collection part. So this is how they do it in Nueces County with the City of Corpus Christi.

1. The tax money is collected by the tax assessor- collector
2. They then cut a check to the organizing entity which in this case would be the city
3. The Appraisal district is only involved in identifying the properties that are in the TIF District and then notifying the tax assessor-collector. Their valuation process I wouldn't think should not change
4. As you know we have already done that since you have a list of those properties that are in the TIF district, so the Appraisal District would get that property information from us. The tax assessor then would have to code their property tax rolls accordingly, and then it would have to make the calculations to determine the increment for each property  
Hope this helps, let me know if you have any more questions

License Agreement – City of Bishop PS Facilities

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 22, 2019  
Re: City of Bishop – License Agreement – Bishop East PS Property

### Background:

As reported last month, in late January the Bishop City Council reviewed the License Agreement drafted by STWA's legal counsel and approved by the STWA Board; however, the Council voted to table action on the Agreement. Email communication indicated that the City wanted modifications. To date, STWA has not received any proposed changes from the City. Today, however, the enclosed email from City Secretary Cynthia Contreras arrived indicating that the Council's March 27, 2019 agenda would include the License Agreement as a topic. This meeting date is the day following STWA's meeting on March 26<sup>th</sup>.

### Analysis:

Staff's analysis from last month is unchanged. Without any specific details or counter language from the City, staff and legal counsel are unable to provide any recommended changes to the offered Agreement.

### Staff Recommendation:

Keep the Board updated on any developments related to this matter.

### Board Action:

Provide feedback to staff and legal counsel. Determine if any additional communication with the City is warranted.

### Summarization:

As indicated in my response to Ms. Contreras, I have placed the Council's meeting on my calendar. However, it warrants reminding the Board that I have attended three (3) Council meetings with the same pattern – the Council goes into a closed session with their legal counsel, the Council returns from the closed session, and without any discussion or specifics the Council either tables action or votes to approve what was discussed in closed session.

**Subject:** Council meeting  
**Importance:** High

Good Morning Carola,

Just wanted to let you know that the License Agreements for STWA and Nueces WSC will be a topic for discussion on Wednesday, March 27<sup>th</sup>; our meeting starts at 5:00 p.m. Have a great day and weekend.

Respectfully,

Cynthia L. Contreras

ATTACHMENT 8

Driscoll Water Supply Contract

Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 22, 2019  
Re: City of Driscoll – 20-Year Wholesale Water Supply Contract

Background:

Enclosed is the most recent email communication sent to Mr. John Valls, Interim City Administrator. As indicated in the email, the City will be holding an election on May 4, 2019 to fill the vacancy on the Council. In addition, City Secretary Armendina Garcia has been contacted and the information provided to Mr. Valls has been forwarded to her.

Analysis:

As reported previously, staff and legal counsel believe that it would be beneficial to meet with City representatives to review the contract and discuss any concerns the City may have. Staff believes that staying in touch with the City is warranted to convey our continued interest in entering into a long-term contract as well as maintaining a record of STWA's efforts in that regard.

Staff Recommendation:

As before, staff will keep the Board updated on this matter and continue to contact the City to arrange a meeting with legal counsel and City representatives.

Board Action:

Provide feedback to staff and legal counsel.

Summarization:

My opinion from last month is unchanged. I believe keeping a line of communication open with the City demonstrates that STWA is making a good faith effort to negotiate a contract which directly impacts the Incremental Fees paid by the City each month. To date, the City has paid \$25,112.61 in those fees.

**Subject:** RE: City of Driscoll - STWA Water Supply Contract

Good Afternoon John,

Just a quick follow-up on contract negotiations. On Monday, March 18, STWA staff will begin working on the Agenda and Packet for the March 26<sup>th</sup> STWA Board Meeting. I have reported to the STWA Board that a vacancy remains on the City's Council. I understand that the City will be holding an election on May 4<sup>th</sup> to fill that available Council position. STWA remains interested in meeting with City representatives to review the offered contract. Please let me know if STWA can provide any additional information.

Thanks and have a great weekend,

Carola

**Subject:** RE: City of Driscoll - STWA Water Supply Contract

Good Morning John,

Just a quick follow-up to our telephone call after Driscoll's recent election. My recollection is that the City will be having another election to fill the vacancy created when Councilman Gonzalez was elected to the Mayor's position. Do you have a timeline for the next election?

STWA would still like to meet with City representatives to review the offered Wholesale Water Supply Contract. As mentioned previously, we believe the process used in negotiating a contract with the City of Kingsville worked very well by meeting several times with City representatives including Kingsville's City Attorney and STWA's legal counsel.

I look forward to hearing from you.

Thanks and have a great day,

Carola

Carola,

I apologize for the delay as it was my hope to have this addressed in November, however, the council does not want to address this issue until the election for a new mayor has concluded at the middle of the month.

I'll be back in touch once that matter is resolved.

Regards and best wishes for a happy Thanksgiving.

John

Good Morning John,

I left a voice message for you at the 387-3011 extension 4 number. We are in the process of preparing the STWA Board Agenda and Packet for the December 4<sup>th</sup> meeting. I will be out of the office most of next week and was hoping to get a head start.

Do you have any information on the City Council's upcoming schedule? As mentioned previously, STWA's legal counsel and I would like to meet with City representatives to review the contract and address any concerns the City may have.

Looking forward to hearing from you,

Carola

Carola G. Serrato

Good Morning John,

Just a quick follow-up on the Driscoll City Council's schedule and the Driscoll – STWA Wholesale Water Supply Contract.

On September 28<sup>th</sup>, when we met on a TxDOT matter, you indicated that the City's Council's anticipated October 3<sup>rd</sup> meeting had to be rescheduled. You thought the meeting could possibly occur during the week of October 8<sup>th</sup> and, if so, the Council would be reviewing the contract on a preliminary basis only.

As stated previously, STWA's legal counsel and I would like to meet with City representatives to review any areas of concern for the City. If the Council would like us to attend an upcoming meeting, please let us know and we will endeavor to attend.

As an FYI, the STWA Board is scheduled to meet next Tuesday, October 22<sup>nd</sup> at 5:30 p.m. in the STWA conference room. This matter will be an agenda item.

Thanks and have a good day,  
Carola

ATTACHMENT 9

Bids – Equipment Barn

Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 22, 2019  
Re: Bids and Award for Construction of an Equipment Barn

Background:

Last month the Board reviewed quotes received for the construction of an equipment shed to house the new excavator. The quotes were for a shed designed to have three (3) bays and would also store anodes and materials for the Cathodic Protection (CP) project. This capital acquisition project was included in the FY 2019 budget in the amount of \$50,000.

After reviewing the bids and discussion, staff was instructed to consider several options including a larger size structure and a structure with two (2) open ends that would be designed to "drive through." The discussion included the possibility of purchasing a prefabricated kit and having field personnel erect the building or hiring a company to erect the purchased kit.

Analysis:

As stated during the meeting, STWA will need to abide by certain guidelines if the price of the project exceeds \$75,000. Enclosed are the applicable rules (Water Code 49.273).

Information was collected regarding larger sized buildings. Enclosed are costs for three (3) larger size kits. (Kit prices obtained in November are also enclosed.) Staff requested bids from three (3) contractors for turn-key construction of a 30' x 100' and 40' x 100' shed using the existing concrete slab and tying into the slab for a new structure. However, only two (2) companies have provided bids despite numerous attempts to obtain the third bid. The larger size kits (without concrete foundation) range in price from about \$26,000 for a 40' x 60' structure to about \$42,500 for a 40' x 100' structure. The turn-key construction prices range from \$78,300 (Will Pope Construction for 30' x 100') to \$131,339 (D&R Sales for 40' x 100').

With regards to the option of purchasing a kit and having field personnel erect the shed, it warrants repeating concerns mentioned in the past. Current work load would likely prevent the shed being built in a timely fashion. As Executive Director, I have considerable safety and liability reservations with regards to STWA field crew being instructed to perform construction tasks that are not typical of their job duties and for which they are unfamiliar.

In addition, kit suppliers have been questioned about providing a contractor and contractors have been questioned about erecting kits. Kit suppliers will not provide a contractor – they may provide a list of companies. Contractors are not typically willing to erect a building that they did not purchase. This raises the issue of responsibility – who will fix the problem when something is wrong. The problems could range from damaged or missing pieces when the kit arrives. Or, the pieces supplied don't "fit" together as they should. Or, after the construction, if a problem occurs the kit supplier and contractor will likely be pointing fingers at one another.

Staff Recommendation:

Following the last meeting, I again discussed the building dimensions, type of shed, anticipated uses for the shed and the possibility of in-house construction with field personnel. The concept of a drive-through shed was also discussed. Based on these discussions, field personnel's preference is for (a) a three-sided

building – they do not see the need for a drive-through shed – (b) that is erected by a contractor on a turn-key basis.

Based on this feedback, there are two (2) recommendations for the Board to consider:

1. Demolish the existing building and use the existing 30' x 50' foundation for a contractor to tie into and add an additional 30' x 50' of foundation to erect a new shed with five (5) bays – four (4) open bays would be 20' x 30' and the fifth area would be a 20' x 30' closed wall shop with a 16' x 16' garage door. See enclosed sketch. Based on the two (2) bids received, staff believes this project will cost more than the \$75,000 amount stipulated in Water Code 49.273(d). In addition, staff believes the project would require engineering services per the description of 49.273 (a).
2. Demolish the existing building and solicit quotes for a contractor to use the existing 30' x 50' foundation to erect a new shed with three (3) open bays – two (2) bays would be 16'8" x 30' and one (1) bay would be 16'8" x 15'. The "back half" of the third bay would be a closed wall shop with a 12' x 12' garage door. See enclosed sketch. Based on the bids reviewed during the February Board meeting, staff believes this project would cost less than the \$75,000 amount stipulated in Water Code 49.273 (d) and would not require engineering services described in 49.273 (a).

Board Action:

Determine whether to:

1. Instruct staff to issue a Request for Qualifications or make a recommendation for the selection of an engineer or engineering firm to provide services for the necessary "bidding documents, plans, specifications, and other data needed to bid" on the construction of a 30' x 100' equipment shed per the requirements of Water Code 273; or
2. Instruct staff to solicit bids from three (3) contractors to demolish the existing equipment shed and erect a 30' x 50' equipment shed on the existing foundation for presentation to the Board at an upcoming meeting; or
3. Select a different size building to construct according to one of the processes outlined in item 1 or item 2; or
4. Select a building size to construct using a method different from the processes outlined in item 1 or item 2; or
5. Forgo construction of an equipment shed.

Summarization:

As stated during the meeting and found in Water Code 49.273 (g), "The board may not subdivide work to avoid the advertising requirements specified in this section." According to legal counsel, this would not apply if the intent in purchasing a kit and having a contractor or field personnel erect the building is meant to save money. However, staff continues to believe that it is best to avoid that perception regardless of the reason.

Acts 2007, 80th Leg., R.S., Ch. 33 (S.B. 657), Sec. 1, eff. September 1, 2007.

Acts 2007, 80th Leg., R.S., Ch. 452 (H.B. 576), Sec. 1, eff. June 16, 2007.

Acts 2009, 81st Leg., R.S., Ch. 87 (S.B. 1969), Sec. 24.006, eff. September 1, 2009.

Sec. 49.272. REPORTS FURNISHED TO PROSPECTIVE BIDDERS. The board shall furnish to any person who desires to bid on construction work, and who makes a request in writing, a copy of the engineer's report or plans and specifications showing the details of the work to be done. The board may charge for each copy of the engineer's report or plans and specifications an amount sufficient to cover the cost of making the copy.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.273. CONTRACT AWARD. (a) The board shall contract for construction and repair and renovation of district facilities

and for the purchase of equipment, materials, machinery, and all things that constitute or will constitute the plant, works, facilities, or improvements of the district in accordance with this section. The bidding documents, plans, specifications, and other data needed to bid on the project must be available at the time of the first advertisement and the advertisement shall state the location at which these documents may be reviewed.

(b) A contract may cover all the work to be provided for the district or the various elements of the work may be segregated for the purpose of receiving bids and awarding contracts. A contract may provide that the work will be completed in stages over a period of years.

(c) A contract may provide for the payment of a total sum that is the completed cost of the work or may be based on bids to cover cost of units of the various elements entering into the work as estimated and approximately specified by the district's engineers, or a contract may be let and awarded in any other form or composite of forms and to any responsible person or persons that, in the board's judgment, will be most advantageous to the district and result in the best and most economical completion of the district's proposed plants, improvements, facilities, works, equipment, and appliances.

(d) For contracts over \$75,000, the board shall advertise the letting of the contract, including the general conditions, time,

and place of opening of sealed bids. The notice must be published in one or more newspapers circulated in each county in which the district is located. If there are more than four counties in the district, notice may be published in any newspaper with general circulation in the district. The notice must be published once a week for two consecutive weeks before the date that the bids are opened, and the first publication must be not later than the 14th day before the date of the opening of the sealed bids.

(e) For contracts over \$25,000 but not more than \$75,000, the board shall solicit written competitive bids on uniform written specifications from at least three bidders.

(f) For contracts of not more than \$25,000, the board is not required to advertise or seek competitive bids.

\* { (g) The board may not subdivide work to avoid the advertising requirements specified in this section. } \*

(h) The board may not accept bids that include substituted items unless the substituted items were included in the original bid proposal and all bidders had the opportunity to bid on the substituted items or unless notice is given to all bidders at a mandatory pre-bid conference.

(i) If changes in plans, specifications, or scope of work are necessary or beneficial to the district, as determined by the board, after the performance of the contract is begun, or if it is necessary or beneficial to the district, as determined by the

board, to decrease or increase the quantity of the work to be performed or of the materials, equipment, or supplies to be furnished, the board may approve change orders making the changes. The board may grant authority to an official or employee responsible for purchasing or for administering a contract to approve a change order that involves an increase or decrease of \$50,000 or less. The aggregate of the change orders that increase the original contract price by more than 25 percent may be issued only as a result of unanticipated conditions encountered during construction, repair, or renovation or changes in regulatory criteria or to facilitate project coordination with other political entities. A change order is not subject to the requirements of Subsection (d) or (e).

(j) The board is not required to advertise or seek competitive bids for the repair of district facilities if the scope or extent of the repair work cannot be readily ascertained or if the nature of the repair work does not readily lend itself to competitive bidding.

(k) The board may use the reverse auction procedure, as defined by Section 2155.062(d), Government Code, for purchasing.

(l) The board is not required to advertise or seek competitive bids for security or surveillance systems or components of or additions to district facilities relating to security or surveillance, including systems used for the prevention of

terrorist or criminal acts and incidents or acts of war, if the board finds that doing so would compromise the safety and security of district facilities or residents.

(m) In accordance with this section, the board of a district created by special law may elect to contract for the construction and repair and renovation of district facilities and for the purchase of equipment, materials, machinery, and all things that constitute or will constitute the plant, works, facilities, or improvements of the district, notwithstanding a conflicting provision in the district's special law. For such a district, an election under this subsection must be by resolution of the board and applies only to a contract entered into on or after the effective date of the resolution.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

**Attachments:** Galvan\_Jr\_Rudy\_PetersenA3DBUILD.pdf; Spec Sheet - 30x100x16.pdf

Rudy,

Attached is the spec sheet for the building we discussed. Here is a site that will help explain the spec sheet and answer a lot of your questions. Here are some brochures that you might want to check out. I'm sure you'll have questions, so don't hesitate to get in touch with me.

**Jens Petersen**

Building Consultant | Armstrong Steel Corp.  
(720) 550-4601 | jens.p@armstrongsteel.com

I spoke w/ Jens twice. Despite my correction regarding the correct name to send the information — the email & quotes were made to Mr. Galvan.

A handwritten signature in black ink, consisting of a large, stylized loop that forms the letter 'J' and ends with a flourish.

## PROPOSAL

3/15/2019

**Will Pope Construction**  
1597 Garcitas Creek Road  
P.O. Box 525  
Inez, TX. 77968-0525  
(361) 782-6690 Office  
(361) 782-8084 Cell

### PROPOSAL SUBMITTED TO:

Attn: Armando Yruegas  
South Texas Water Authority  
P.O. Box 1701  
Kingsville, Texas  
ayruegas@stwa.org

### Will Pope Construction hereby submits specifications for:

Demo and haul off existing building  
30' x 100' x 20' high side pre-engineered building  
120 mph exposure C with a 1 on 12 pitch  
All galvanized framing  
Building constructed per plan  
(1) 16' x 16' roll up wind loaded door with chain hoist  
(1) 3' x 7' metal building door  
Windstorm Inspection and Engineering

### Concrete Work:

Pour 30' x 50' engineered concrete slab  
Break out (6) areas of existing slab to pour spread footings for columns  
Pour (6) 3' x 3' x 4' spread footings for columns over existing concrete

Will Pope Construction proposes hereby to furnish all labor complete in accordance with the above specifications for the sum of:

**Seventy-Eight Thousand Three Hundred Dollars and no/100's**

**\$78,300.00**

With payments to be made in three installments as follows: 1. One third due upon concrete pouring. 2. One third due upon delivery of building materials. 3. Balance due within five days of turnkey completion.

Any alteration or deviation from above specifications involving extra costs will be executed only upon written order and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents, or delays beyond our control. Damages, delays and/or material overages due to inclement weather may result in additional charges. The owner may at his/her discretion require soil testing (Geotechnical Report on soils at the building location) to be performed solely at their own expense. Prices are guaranteed for (15) days from proposal date.

Respectfully Submitted

---

### Acceptance of Proposal

The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payments will be made as outlined above.

WE ARE PLEASED TO SUBMIT YOU OUR QUOTATION FOR THE FOLLOWING:

D & R Sales Co. proposes to furnish and install the following engineered steel buildings and foundation:

**Building: 30 x 100 x 20' to 17'6 Single Slope**

- 120 mph wind code.
- Five (5) 20' bays.
- Last bay fully enclosed.
- Hot dipped galvanized primary steel, cold galvanized secondary.
- 26 ga. PBR Sig 200 color roof and walls.
- One (1) 16 x 16 sectional overhead door with outside keyed lock and chain hoist – wind rated.
- Low side gutters.

**Foundation: 30'3 x 100'3 x 5" thick**

- #4 rebar 12" o/c in mat.
- 12" x 36" exterior beams, 12" x 30" interior beams with #3 stirups 18" o/c with two (2) #5 bars.
- 6" fill, 10 mil poly.
- Hot dipped galvanized anchor bolts.
- Based on clear level site.

Includes basic standard city permit, windstorm and insurance.

**NOTE:** Any other city requirements such as civil drawings, drainage, survey, electrical and landscape will be at an additional cost.

**TO: South Texas Water Authority**

**PAGE 2 of 2**  
**DATE: 03/14/19**

**Total Price: \$110,050.00 No Tax**

**Alt. #1: Go with a 40' wide in lieu of 30'.**

**Total Price: \$131,339.00**

➤ **DUE TO VOLATILITY OF STEEL PRICES, THIS QUOTATION IS SUBJECT TO PRICE ADJUSTMENT EQUAL TO STEEL PRICE INCREASES FROM THE DATE OF THIS QUOTATION UNTIL TIME OF MATERIAL DELIVERY.**

**ESTIMATED DELIVERY:**

**TERMS:**

**WARRANTY:** All products sold by Seller are warranted against failure due to defective material or workmanship for a period of one (1) year from completion. **SELLER MAKES NO OTHER WARRANTY, EITHER EXPRESS OR IMPLIED, OF ANY KIND OR CHARACTER AND SPECIFICALLY MAKES NO WARRANTY AS TO THE MERCHANTABILITY OF ANY PRODUCT SOLD BY SELLER.**

This quotation constitutes an offer by Seller which offer may be accepted by the subsequent signing of this quotation by Buyer AND THE RETURN AND DELIVERY to Seller of the signed copy within 15 days.

Chloramine Booster Station – Kingsville Pump Station

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 20, 2019  
Re: Chloramine (Chlorine and Ammonia) Boosting for Ricardo WSC 12-inch waterline

### Background:

Last month the Board authorized staff to begin researching the possibility of installing a disinfection booster station upstream of the master meter that measures the volume of water sold to the Ricardo Water Supply Corporation (RWSC). As discussed during the meeting, the need for a booster station was recommended by Mr. David Simons, TCEQ, during a February 15<sup>th</sup> meeting following field investigation pertaining to disinfection byproducts and the operation of pump stations' disinfection systems.

The installation of a booster station will include numerous steps. The first step was to determine if the addition of a booster station on the 12" RWSC waterline would require submitting sealed engineering plans to the TCEQ for approval. Mr. Simons was contacted and he indicated that is the case. However, he asked whether it would be possible to use the existing Chlorination and LAS system boosting the residual on the Kingsville Meter Run (MR). I indicated it may be possible and it would depend on several factors.

Following the discussion with Mr. Simons and reviewing the concept with field personnel, Mr. Aaron Archer, Walker Partners, was contacted about both the RWSC MR Booster Station and Mr. Simons' suggestion. Enclosed please find emails with a schematic. It appears it may be possible to boost the residual of water delivered to Kingsville and RWSC using one (1) system. However, this will require additional research. The project would require installing a new section of 12" waterline upstream of the RWSC meter and tapping into the Kingsville MR upstream of the MOV and Meter but downstream of the chemical injections in order to avoid any operational complications. The cost of the new line, tap and necessary controls which will allow the chlorinator to receive signals from two points – Kingsville Tank Level and the RWSC line – would need to be compared to the estimated cost of installing a new booster station. In last month's memo staff listed the following as a minimum number of items for the project: some type of flow device/switch, electricity hookups, two (2) concrete slabs, two (2) prefab buildings, two (2) sets of controls, a chlorinator, a chlorinator pump with plumbing, a LAS pump with plumbing, two (2) digital scales, a LAS Containment system, two (2) taps for monitoring and two (2) taps for chemical injection.

### Analysis:

Staff is inclined to believe tapping the line and using one system to boost the residual for both Kingsville and RWSC will be more cost effective. The project will likely require a set of sealed engineering plans and advertising for bids. But, staff believes it will not require review and approval by the TCEQ.

### Staff Recommendation:

Continue researching using the existing system to boost the residual for Kingsville and RWSC. Keep the Board updated. At a future meeting, seek the Board's instruction on securing engineering services.

### Board Action:

Provide feedback to staff.

### Summarization:

Staff believes taking the necessary measures to boost the residual of RWSC's supply is prudent.

**From:** mcserrato@stwa.org

**To:** 'Aaron Archer'  
**Cc:** 'Dony Cantu'; 'Frances Rosales'; 'Jacob Hinojosa'; 'Jo Ella Wagner'  
**Subject:** RE: 1.0 GST Plans - Kingsville MR and Disinfection Boosting for RWSC 12" line

Aaron,

I spoke with Jacob and then called Blake Roye with EI2. Jacob is of the opinion that it may not be necessary what we are trying to accomplish with the SCADA system. We are wondering if a hard wired connection from a flow meter added to the RWSC line and connected into the KI chlorination system would work.

When I spoke to Blake and asked whether EI2 worked on setting up the controls through a SCADA system, he said they did not provide that kind of service. However, I mentioned Jacob's idea and he said it should work without too much difficulty – I'm not sure I captured the entire concept of a splitter and then totalizing the two signals and then the milliamps being converted.

However, if it is necessary to involve the SCADA system, Blake indicated that this would be the type of service that Mercer Controls provides.

**Subject:** RE: 1.0 GST Plans - Kingsville MR and Disinfection Boosting for RWSC 12" line

Aaron,

Mercer is somewhat familiar with the components at the KI MR. But, EI2 should also be able to grasp the way the system works without any problem. Jacob is out until Tuesday. I will see if he has a preference about contacting Blake Roye instead.

Jacob and I also discussed whether there was the potential for the Kingsville Meter (and RWSC Meter?) to roll backwards depending on the timing of start/stop if both KI and RWSC are taking water.

**Subject:** RE: 1.0 GST Plans - Kingsville MR and Disinfection Boosting for RWSC 12" line

Carola,

This is very helpful. I prefer the concept of relocating the RWSC tap to the upstream side of the Kingsville MOV to simplify control and instrumentation. This would involve replacing the 44" spool piece to include a 10" x 10" tee and I may look at inserting a small inline static mixer upstream of the tee to promote mixing. This could be important when both RWSC and Kingsville are taking water to make sure that neither ends up getting a disproportionate amount of LAS or chlorine after the flow split to RWSC. I suspect that it should not be an issue to program the chloramines booster station to dose based on the RWSC MR and KI MOV. Is Mercer familiar with the SCADA system in KI? If so, it may not be a bad idea to have him or another integrator confirm the feasibility of this programming approach before we go too far down this path.

**Subject:** RE: 1.0 GST Plans - Kingsville MR and Disinfection Boosting for RWSC 12" line

Aaron,

Attached is a bit more information on the Kingsville MR and our understanding of what could possibly be installed and some of the challenges depending on where the RWSC tap would be located. Jacob says he has the ppd setting at around 30 which boosts to about a 2.5 mg/l residual in the KI GST. He thinks with the lower gpm in the RWSC line that setting should still not be a problem.

Please let us know if you need additional information.

If tap is downstream of KI MOV and KI Meter then:

- KI bill will be net amount after deduct for RWSC usage.
  - KI MOV will need to get signals from:
    - KI GST
    - PS #1
    - PS #2
    - PS #3
  - KI MOV sends signal to CL2 which in turn signals LAS.
  - Additional MOV would be needed to keep KI GST from overflowing?
- If tap is upstream of KI MOV and KI Meter but downstream of CL2 & LAS injection then valve on RWSC MR can remain open and water will flow whenever MOVs open at
    - PS #1
    - PS #2
    - PS #3
  - Flow switch on RWSC MR would send a signal to KI CL2 which in turn signals LAS.
  - This means CL2 system would be getting signals from 2 systems – KI GST and RWSC MR. Is this possible?
  - What would happen when both are calling for injection?

ATTACHMENT 12

CP Report/Anode Bids

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 21, 2019  
Re: Authorization to purchase zinc anodes, including freight charges/CP Project Update

### Background:

Enclosed are memos from the last anode purchases in October 2001 and April 2002. Also enclosed are four (4) bids for the purchase of either 250 anodes or 500 anodes. Staff has been told the Bobcat excavator ships out from North Dakota this week. The new trailer is expected to arrive the first week of April. Enclosed is Mr. Armando Yruegas' memo on the status of the project including his recommendation on the purchase of the anodes.

### Analysis:

It has been approximately seventeen (17) years since the last purchase of anodes. At that time, the cost was \$29.36 per anode. As you can see from the recent quotes, the cost has increased substantially. Also, due to price fluctuation, some quotes are time sensitive. Below is a chart summarizing the four (4) bids:

Company	Valid Period	Cost @ 250	Freight	Total	Cost @ 500	Freight	Total
Aegion/Corrpro	To 3-27-19	\$91.50	included	\$22,875.00	\$85.25	included	\$42,625.00
Farwest CCC	??	\$162.00	??	\$40,500.00	\$158.95	??	\$79,475.00
Galvotec	1 Day	\$90.59	\$600.00	\$23,247.50	\$89.39	\$600.00	\$45,295.00
Stuart Steel Protection	24 to 72 hours	\$87.44	FOB Delivered Subject to Fuel Surcharge	\$21,860.00	\$86.94	FOB Delivered Subject to Fuel Surcharge	\$43,470.00

Between March 19, 2019 and hiring the second CP tech on January 21<sup>st</sup> (2 months), the CP crew has installed 122 anodes covering 7,176 feet of 42" line, 3 replaced test stations and 2 new test stations. Staff estimates 250 anodes could be installed in three (3) months and 500 nodes in six (6) months. There are currently about 150 anodes in stock. Another factor to consider when determining the number of anodes to purchase is the availability of storage for the anodes.

Enclosed is information regarding the price of zinc over a 30-year period as well as the more recent price fluctuations. According to websites regarding metal prices, the major reasons for price change is due to Chinese Demand, Chinese Supply, Global Stocks, US Demand and Input Prices (the price of mining/refining the ore which uses coal, electricity and oil for energy).

### Staff Recommendation:

Staff will call Galvotec and Stuart Steel the day of the Board meeting to obtain a valid quote. However, at this time, staff recommends the purchase of 500 anodes from Aegion/Corrpro at a cost of \$42,625.

### Board Action:

Determine whether to authorize the purchase of 500 anodes from Aegion/Corrpro at a cost of \$42,625.

### Summarization:

Cathodic Protection is an ongoing maintenance task and anodes are essential to this project.

To: Carola G. Serrato, Executive Director

From: Armando Yruegas, CP Technician

Date: March 19, 2019

Re: CP Update

As of March 19, 2019, 122 anodes on 107 joints on the 42" water line have been installed. This places installations at a total of 7,176 feet north of the office on King Ranch property. We have completed all of the joints on the King Ranch Property. We have replaced 3 old test stations with new ones and installed 2 new test stations. From Station 71+76 thru Station 304+82 we will be replacing 14 old test stations with new ones. We have completed 30,482 feet of the 52,300 feet of Contract 1. Hopefully we will finish Contract 1 in 6 months.

We have been checking both rectifiers, which are connected to the 42" on 1<sup>st</sup> Street in Bishop and CR 4. Both are working properly. These 2 rectifiers cover 21,122 feet of cathodic protection on Contract 1, which extends from FM 70 to the Nueces/ Kleberg County line.

We have about 150 anodes left from what we had in stock. These should last us until the beginning of May. I recommend purchasing 500 anodes from Corpro for \$85.25 each. These 500 anodes should last us 6 months.

I recommend waiting 6 months after finishing Contract 1 and have Russell/EN Engineering do a Close Interval Survey on Contract 1.

The Bobcat E85 excavator should be shipping out next week from Fargo, North Dakota. The new heavy equipment trailer should be arriving on the first week of April.

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: April 18, 2002  
Re: Bids for 1,500 Zinc Anodes

### Background:

Following the last meeting, staff advertised for sealed bids on 1,500 anodes for the CP project. The bid opening was held on April 18, 2002. Enclosed is the bid sheet. The previous award for anodes was \$29.36 per anode.

### Analysis:

As mentioned in the memorandum last month, the capital acquisition line item includes a balance of \$49,361.53 for the CP project. Staff has calculated a minimum of 1520 anodes will be required to protect the remaining line. The purchase of 1500 anodes would leave approximately 440 anodes in inventory. The award of the bid to Corrpro at a cost of \$43,545 will leave a balance of \$5,816.53 for other necessary item such as coatings, clips, wires, etc. However, staff has reviewed our previous estimate on the cost of anodes and recommended in the FY 2002 budget amendments to transfer the approximate saving of \$500 to the engineering line item under capital acquisition.

### Staff Recommendation:

Award the bid to lowest responsible bidder.

### Board Action:

Determine whether to award the bid to the lowest responsible bidder by adopting Resolution 02-06.

### Summarization:

Staff continues to rank this project as a high priority and believes steady progress is being realized.

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 20, 2002  
Re: Authorization to advertise for bids for 1,500 zinc anodes, including freight charges.

### Background:

Staff has inventoried the remaining number of anodes and estimated the number of excavations/installation remaining on Contract #3. Staff has considered the need to maintain an anode inventory for areas that require additional protection from elevated stray currents such as at existing or new pipeline crossings.

### Analysis:

Currently, the capital acquisition line item includes a balance of \$49,361.53 for the CP project. There are currently 460 anodes in inventory and 380 estimated remaining installation sites. Based on an average of 4 anodes per site, a minimum of 1520 anodes will be required. The latest awarded bid quoted a price of \$29.36 per anode. Therefore, it is estimated that \$40,040.00 would be needed to purchase 1500 anodes leaving approximately 440 anodes in inventory. Should this bid closely match the last award, approximately \$5321.53 would remain available for other CP supplies (wires, clips, mastic, etc.).

### Staff Recommendation:

Authorize staff to advertise for bids for 1500 anodes.

### Board Action:

Determine whether to authorize staff to advertise for bids.

### Summarization:

Once again, staff continues to identify this project as a highest priority. Although cathodic protection of the 42" pipeline will never be finished, this purchase will enable the Authority to essentially complete this project.

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: October 29, 2001  
Re: Anode Bid FY 2002

### Background:

Following the last meeting, staff advertised for sealed bids on 1,000 anodes for the CP project. The bid opening is scheduled for Tuesday, November 6. Bid tabulation information will be provided at the meeting. The previous award for the same number of anodes in June 2001 was \$32,490.

### Analysis:

Mr. Yruegas has indicated that current inventory is approaching depletion. This purchase will cover approximately 250 excavations or 25,000 lineal feet. Contract 2 is near completion with 9,333 remaining feet. The combined remaining footage in Contract 2 and 3 is 54,373. The budgeted amount for FY 2002 is \$88,000. With the purchase of this shipment, the approximate total cost for the CP project to date is \$191,000. Another shipment just prior to year's end may be possible. That bid would likely be for 1150 – 1250 anodes with an estimated cost of \$38,000 to \$40,000.

### Staff Recommendation:

Award the bid to lowest responsible bidder.

### Board Action:

Determine whether to award the bid to the lowest responsible bidder by adopting Resolution 01-46.

### Summarization:

Staff continues to rank this project as a high priority and believes steady progress is being realized.

**From:** Joel Cisco <JCisco@aegion.com>  
**Sent:** Monday, March 04, 2019 12:27 PM  
**To:** Armando  
**Subject:** RE: [EXTERNAL]Quote on Anodes  
**Attachments:** Quote 250 Zinc Anodes.pdf; Quote 500 Zinc Anodes.pdf; Credit Application.doc

Good afternoon Armando.

I have attached two materials proposals for both quantities of packaged zinc anodes with about a 7% quantity discount per anode for an increased purchase from 250 to 500.

Also, to keep the pricing simplified I have quoted these anodes to include freight so there is no additional estimate for the delivery. The only cost not included would be tax if applicable.

Please review and let me know how we look on these.

Thanks again for the opportunity.

Applicable sales tax will apply unless a resale or exemption certificate is provided. 3. The shipping date provided is an estimate and may be subject to change. 4. Freight charges are NOT included unless otherwise noted. 5. Net 30 day terms are provided with an existing account in good standing or upon our approval of required credit information from client.

**Return Policy:** All returned material requires written approval. Material can be returned within 60 days of purchase. Custom, made-to-order, special or unique items are not returnable. We will not accept returns for liquid epoxy coatings. Freight to return material is to be paid by the customer. Only items returned in original packaging and in resalable condition will be refunded. A minimum 25% Restocking Fee will be applied on all returned materials.

COMPANY**

**Installation Methods** – Zinc soil anodes can be vertically or horizontally installed in native soils and should be wetted before burial. The anode cable can either be connected directly to the structure or through a cathodic protection test station. Typical cable-to-structure connection methods include welding and mechanical attachment.

**ASTM B-418 Type II. Zinc Anode Chemistry**

## Zinc Anodes for Soil Application

*Galvanic anodes made of 99.99% pure High Grade Zinc  
for cathodic protection of metal structures buried in soil*

### Background on Zinc Anodes

An industry standard for many years, zinc galvanic anodes are utilized to protect a variety of steel structures from the affects of corrosion. Historically, zinc anodes have been designed for use in salt or brackish water applications. Due to the U.S. Navy's widespread use of zinc in the early 1950's, a specification (MIL-A-18001) was developed for galvanic zinc anodes in seawater. This zinc specification, with revisions, is still in use today and is a standard in the corrosion control industry.

### Soil Anodes

Farwest provides sacrificial zinc anodes made to ASTM-B-418 Type II specifications for corrosion protection of steel structures in soil. These anodes are made from 99.99% pure Special High Grade Zinc and are ideally suited for galvanic protection of metal in soil.

**Fabrication** – Farwest attaches an insulated copper lead wire to the anode core Zinc Anode and seals the connection interface with heat shrink tubing or with layers of suitable splicing tapes. The wire size, length and insulation type is typically chosen by the customer depending on the application. If required, Farwest also packages the anode in a cloth bag filled with a low resistance backfill mixture consisting of 75% hydrated gypsum, 20% Bentonite and 5% sodium sulfate.

**Applications** – Due to the fact that zinc anodes have a lower driving voltage than that of magnesium, zinc anodes are typically used in low soil resistivity applications. Typical applications include buried pipelines, tanks and a number of other similar uses.

**Available Sizes** – Zinc soil anodes are offered in a variety of sizes shown on the chart below.

**Anode Cores** – Zinc soil anodes are normally cast with a 1/4" galvanized mild steel core to which the anode cable is connected.

Yes. Both quantities will cost the same in freight due to them both having to ship via an LTL carrier.

Thank you,

Surplus Property

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 20, 2019  
Re: Surplus Property Sale and Declaration of Salvage Property

### Background:

The last time the Board considered a Surplus Property Sale was in January of 2018. At that time, staff requested Mr. Bill Flickinger's advice on whether the sale could be conducted with one Board meeting during which the Board declares the items on the attached list as surplus, authorizes sale of the attached list, approves the sale to the highest bidder, declares any items not receiving a bid as salvage property and instructs staff to dispose of those salvage items. Mr. Flickinger indicated that the sale could be conducted in that manner.

### Analysis:

Enclosed please find a list of the items staff is recommending for the Surplus Property Sale. As stated previously, these types of sales are a necessary housekeeping task.

### Staff Recommendation:

Approve a motion to declare the items on the attached list as surplus, authorize sale of the attached list, approve the sale to the highest bidder, declare any items not receiving a bid as salvage property and instruct staff to dispose of salvage items.

### Board Action:

Determine whether to approve a motion to declare the items on the attached list as surplus, authorize sale of the attached list, approve the sale to the highest bidder, declare any items not receiving a bid as salvage property and instruct staff to dispose of salvage items.

### Summary:

A follow-up report on the sale will be posted as an agenda item after the property has been advertised, bids opened, and either sold or disposed as salvage items.

## Surplus Property Sale Items

- 1 One (1) white 2011 Ford F250 Diesel Single Cab Pickup Truck
- 2 One (1) Case 760 Trencher
- 3 16 foot trailer
- 4 21 tires
- 5 GE Motors Air Compressor
- 6 Eight (8) Tool Boxes
- 7 One (1) 60 gallon Air Compressor
- 8 Two (2) Head Racks
- 9 One (1) Black Tool Box
- 10 Two (2) 2" Trash Pumps
- 11 One (1) Kawasaki 220 Bayou 4-Wheeler
- 12 One (1) 90-psi Ingersoll Rand Air Compressor
- 13 One (1) Echo Weedeater
- 14 Two (2) Dell Monitors
- 15 Two (2) Intel i3-3220 CPU 3.30GHz computers, 8.00 GB RAM, DVD
- 16 Fujitsu fi-5015C scanner

Con Mims Response

Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 18, 2019  
Re: Con Mims' Response to Resolution 19-10

Background:

As the Board is aware, last month Resolution 19-10 was adopted by the Board in recognition of Con Mims, Nueces River Authority's Executive Director, and his service in the field of water resources. Enclosed is Mr. Mims' response to South Texas Water Authority passing the resolution.

Analysis:

Staff thought the Board should be made aware of Mr. Mims' appreciation.

Staff Recommendation:

None needed.

Board Action:

None needed.

Summarization:

In addition to the NRA Board and staff, Mr. Mims' service will be missed by many committee members and agencies' personnel.

**From:** mcgserrato@stwa.org  
**Sent:** Monday, March 4, 2019 11:17 AM  
**To:** 'Con Mims'  
**Cc:** 'Rocky Freund'  
**Subject:** RE: STWA Resolution 19-10

Con,

Thank-you for your kind words.

I hope you have lots of great plans for your retirement – you really deserve the best.

Take Care.

Carola

**From:** Con Mims <cmims@nueces-ra.org>

ATTACHMENT 16  
TAMUK Funding Request

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 20, 2019  
Re: Funding Request – TAMUK – Nanotube Technology – Water Treatment

### Background:

Enclosed please find a request from Dr. Amit Verma and Dr. Sajid Liu for funds to sponsor a study related to the use of Nanotube Technology as an alternative to conventional water treatment. The request is in the amount of \$10,533 and would be 10% of the total study cost. Implementation of the study is contingent on the remaining 90% funding being secured from the Qatar Foundation. The last time the Board considered a request for funding was about six months ago. That proposal was submitted by Dr. Lee Clapp, TAMUK, and the AgriLife Extension Office and it pertained to private groundwater well screening and testing for various chemical constituents.

### Analysis:

I have reviewed the information provided several times. The study is of a very complex nature. The proposal is indicating that the use of nanotubes for treatment of groundwater, industrial discharge water and municipal discharge water is possible. In addition, the proposal is indicating that the treatment would disinfect, desalinate and remove constituents contributing to the discoloration of the source waters.

### Staff Recommendation:

Consider providing funds for the study.

### Board Action:

Determine whether to provide \$10,533 for the study. If approved, authorize staff to provide the letter of support as requested by Drs. Verma and Liu.

### Summarization:

The study poses a very interesting question as to whether a new type of technology can be used for water treatment. However, I would caution that there is a reference to travel for a STWA board member in the "Other Benefits" section which staff believes would not be appropriate as a benefit for providing funds.

METAL CENTERED NANOTUBE NETWORK FOR WATER DISINFECTION AND DESALINATION  
(CNNDAD)

**Funding Agencies:** South Texas Water Authority (STWA),

**Applicant/Institution:** Texas A&M University – Kingsville (TAMUK)  
**Principal Investigator:** Dr. Amit Verma, College of Engineering (TAMUK)  
**Collaborator:** Dr. Mohamed Shibl (Qatar University & Foundation)  
**Address:** 940 W. Santa Gertrudis Av, MSC 161, Kingsville, TX 78363  
**Telephone Number:** (361) 593-4253  
**Email:** Amit.Verma@tamuk.edu  
**Total Funding Requested:** \$98,398 (\$87,845 from Qatar Foundation and \$10,553 from STWA)<sup>3</sup>

The proposed project encompasses the integration of the following **specific aims** and assignment table (**Table 1**):

- 1) Protect public health by collecting ‘test’ samples from the standard coal power utility, city wastewater plant or local landowner have a obtain a standard ‘test sample’<sup>1</sup> and analyzing quality using a new generation of visible light responsive catalysts<sup>2</sup> (Dr. Sajid Liu, College of Arts & Sciences, TAMUK);
- 2) Synthesis of a new disinfectant using nanomaterials which are activated by visible light (Dr. J. Louise Liu, College of Arts & Sciences, TAMUK);
- 3) Increase public awareness of water purification technology through an organization of a national symposium on clean water via the American Chemical Society Energy & Fuels Division (ACS ENFL), with multiple speakers and publication of *Proceeding* or thematic edited book (Dr. Sajid Liu, College of Arts & Sciences, TAMUK);
- 4) Expand on current disinfection technologies through advanced modeling using higher order density function theory correlation of exchange hybrid constructs (Dr. Verma, College of Engineering, TAMUK); and
- 5) Enhance professional training of one chemistry or environmental engineering graduate student at Texas A&M University-Kingsville (TAMUK).

Please note if our petition to the STWA is approved we request:

A letter of support from STWA is requested in the on a preliminary basis to provide the required funds if similarly supported by the Qatar Foundation. This conditional letter will be uploaded to the online request [reference NPRP12S-0313-190350] filed at <https://www.qnrf.org>.

Notes:

<sup>1</sup>The purpose is to bench test our CNN DAD photocatalyst against one or two 'test' samples and one or two laboratory samples created to simulate wastewater contaminated with microorganisms, and organic dyes. For this purpose, we have access to a coal power station, whose cooling wastewater could be utilized, or water from the local treatment plant or groundwater from a local landowner.

<sup>2</sup> Most disinfection is done by either boiling of water, filtration, the addition of chloramination (Cl<sub>2</sub>, ammonia), phenol, ultraviolet radiation or Clorox-type bleach. In microbiology, bleach is often used as a sterilization agent, as it provides complete disinfection of a wide spectrum of microorganism. The organic residue of the microorganism is completely destroyed resulting in the formation of chloramines which in turn can pose health issues including triggering of allergies via MHC association with the cell plasma of mucous membranes. For this reason, our CNN DAD is compared and contrasted with bleach as a disinfectant.

<sup>3</sup> If this project cannot be supported with research funds, we seek payment-in-kind support, either with assistance with the dissemination and outreach effort, promotion of the American Chemical Society Symposia on Water Research, or assistance with student placement at a facility which will donate water samples for us to utilize as 'test' samples. Some payment-in-kind which can be used to show synergy to the Qatar Foundation via a letter of support from STWA.

**Table 1: Summary of responsibility for each task including the area of expertise and experience to complete the assignment.**

Aim	Task	Supervisor / Dr	Expertise	Experience
1	Procurement of water samples and biochemical analyses	Sajid Liu	Bioanalytical Chemistry	15 years
2	Synthesis of nano disinfectant	J. Louise Liu	Nanochemistry	15 years
3	Dissemination through American Chemical Society Energy & Fuel Division (ACS ENFL) Symposium on Water Purification	S. Liu	Current Secretary of the ACS ENFL	5 years
4	Computer Modeling of which metals are most efficient in the design of Nano disinfectant	A. Verma	Density function theory modeling	20 years
5	Graduate Student Supervision	ALL	Full Professors	36 years

## 1. Summary

Texas A&M University-Kingsville (TAMUK) proposes to partner with the South Texas Water Authority (STWA) and the Qatar Foundation (QF) to expand existing efforts to disinfect (immediate goal) and desalt (long-term goal) municipal and industrial wastewater. STWA works with governmental entities, water supply corporations, industry, and commerce to maintain dependable water supplies for residents in central Kleberg County and western Nueces County. QF provides support for advanced research in 4 cluster areas (1. Energy & Environment, 2 Biomedical & Health, 3. Computer Science information and communications technology, and 4. Social Sciences, Arts and Humanities) to help Qatari people and communities become self-sufficient with the assistance of US-based research entities. Approximately 90 % of requested support, will come from QF which we will use to conduct research related to the modeling, design, synthesis and evaluation of a new generation of visible light responsive nanomaterial (CNN DAD) capable of disinfection and decolourisation of ground or wastewater (immediate priority) and then investigate the feasibility of re-use as a solar fluid within a solar still for desalination of water via evaporation using sunlight. The nanomaterial will offer considerable advantages as currently there is no single platform which can disinfect, decompose and desalinate a water sample. We propose the CNN DAD would be able to compete in these three areas as a single unified agent. The water boil advisory notices are primarily due to the presence of disinfectant by-products resulting from chemical oxidizers such as bleach. Chemical agents like bleach are effective at killing 99.9 % of fecal coliform bacteria because in a water bleach forms oxygen radicals or reactive oxygen species (ROS). These ROS species have the highest concentration at the time of bleach addition (time equals 0 h) but their population decays over 2 – 3 days, thereby requiring periodic additions of bleach. In disinfection science this is known as persistence and bleach is persistent to approximately 48 h. Our CNN DAD agent captures visible light and converts water to ROS locally and these agents decay over 38 h but are regenerated, because unlike bleach, sunlight does not decompose CNN DAD. Therefore its persistence can be measured in weeks or months and its effectiveness does not decrease with time, unlike that of bleach, which with time, the concentration of the ROS generator [the bleach] and ROS [actual species which causes disinfection] decay with time. By sampling water from two or three divergent sources, the effectiveness over time [persistence], disinfection spectrum of action [disinfection, decontamination, decomposition, and desalination] of our agent can be compared and contrasted with traditional in-house methods such as boiling, or use of bleach or filtration [1].

Most laboratory programs focus on good monitoring and have been limited to analyzing samples for nitrate, salinity, arsenic, and fecal coliform bacteria, but not on disinfection technologies, or desalination. Low-Cost disinfection, decomposition, decontamination and desalination technology which can also be used as a standalone purification platform uncoupled to any central system, as used by wastewater plants to meet the requirements of the clean water act is urgently needed. There also is the possibility that CNN DAD would be superior to in-home water filtration / reverse osmosis units in providing water which is safe for drinking, at a minimum a resource which can be activated during an emergency such as hurricanes, where power disruption would make the reverse osmosis filtration unit inoperable unless there was an emergency generator [2].

\* Boil water notices are not issued for DBPs.

The proposed collaborative research program would significantly expand the resources developed using funds from Qatar to the benefits of its citizens as well as citizens from Kleberg, Kenedy and Nueces Counties, as the research is being led by scientists from Texas A&M University-Kingsville with a track record in Engineering and Clean Water Science. In addition, the collected data would be made available to the wastewater treatment facilities in the three counties to assist with hurdles in generating clean water.

Our proposal is for these materials to be used for disinfection, and desalination purposes as potential replacements for the current chemical treatment approach operated by the wastewater operators.

The data will also enable STWA to conduct strategic planning and guidance on whether nanomaterial-based treatment options are viable and competitive with current chemical treatments, such as colony forming units per milliliter of microorganism in the water, cost per one thousand gallons relative to current technologies. In addition, this proposal enables a unique opportunity for STWA Board members to review business practices, challenges and solutions of the Qatar General Electricity & Water Corporation (كهرماء) and how it meets these challenges, enabling both agencies to incorporate best practices from each other's portfolios to the betterment of its local community [3].

TAMUK is requesting a total of ~~\$9,670~~ <sup>\$10,533</sup> from STWA to support a graduate student for 3.5 months and dissemination of our scientific findings and outreach. This will include compensation for travel to and from the selected conference for the team or partial travel fees for a selected speaker for the Water Nexus Symposia, and report writing. Each participating entity (Qatar Foundation and STWA) will be provided with a report summarizing the water quality of the 'test' samples and how our CNN DAD was able to compete relative to chloramine based disinfection agents and the degree to which the groundwater conforms to existing standards for drinking water.

### **Objectives**

The main objectives for the proposed project are to (also summarized on page 1 and **Table 1**):

1. Protect public health by collecting 'test' samples from the standard coal power utility, city wastewater plant or local landowner have a obtain a standard 'test sample'<sup>1</sup> and analyzing quality using a new generation of visible light responsive catalysts<sup>2</sup> (Dr. Sajid Liu, College of Arts & Sciences, TAMUK);
2. Synthesis of a new disinfectant using nanomaterials which are activated by visible light (Dr. J. Louise Liu, College of Arts & Sciences, TAMUK);
3. Increase public awareness of water purification technology through an organization of a national symposium on clean water via the American Chemical Society Energy & Fuels Division (ACS ENFL), with multiple speakers and publication of *Proceeding* or thematic edited book (Dr. Sajid Liu, College of Arts & Sciences, TAMUK);
4. Expand on current disinfection technologies through advanced modeling using higher order density function theory correlation of exchange hybrid constructs (Dr. Verma, College of Engineering, TAMUK); and

- Enhance professional training of one chemistry or environmental engineering graduate student at Texas A&M University-Kingsville (TAMUK).

## 2 Scope of Work

### Task 1 – Synthesis of CNN DAD (Jingbo Liu)

A titania iron oxide ( $\text{TiO}_2\text{-Fe}_3\text{O}_4$ ) nano-hybrid nanoparticle (NP) material will be prepared as a candidate to evaluate its performance as a desalination and decontamination agent. Titanium tetra-isopropoxide ( $\text{C}_{12}\text{H}_{28}\text{O}_4\text{Ti}$ , TTIP, 2.5 g, 8.8 mmol) and Iron oxide ( $\text{Fe}_3\text{O}_4$ ) which will be added drop-wise to a solution containing a mixture of acetic acid and ethanol (50.0 mL) with a volume ratio of 1:1. In the next step, 0.08 g carbon nanotubes (CNTs) and 0.4 g of  $\text{Fe}_3\text{O}_4$  nanoparticles, in 400 mL of isopropanol will be added together, allowing this mixture to react for 20 h. Then it will be sonicated to obtain the product which will then be washed with ethanol. The final product obtained will be dried overnight in an air flow oven at 100 °C, and later annealed at 500 °C for 3 h. Functional groups such as carboxyl groups and hydroxyl groups on the surfaces of  $\text{Fe}_3\text{O}_4$ , CNT and  $\text{Fe}_3\text{O}_4\text{@CNT}$  nanoparticles are hydrophilic and the nanoparticles should be easily dispersed in water resulting in the formation of a carbon nanotube network (CNN) for disinfection and desalination applications [4].

### Task 2- Addition of Silver to enable CNN to be responsive to Visible Light (Jingbo Liu)

Silver nitrate ( $\text{AgNO}_3$ ) will be deposited onto  $\text{TiO}_2\text{-Fe}_3\text{O}_4$  nanoparticles (NPs) to enable visible light (VL) responsivity of CNN for disinfection and desalination of groundwater. The deposition of silver nanoparticles over  $\text{TiO}_2\text{-Fe}_3\text{O}_4$  will be performed in order to increase the photo-activity.  $\text{TiO}_2\text{-Fe}_3\text{O}_4$  (CNN, 19.0 mg) will be suspended in deionized water (12.0 mL) under sonication, and then heated to 50 °C before adding  $\text{AgNO}_3$  (246 mL, 10.0 mM), followed by addition of sodium ascorbate until the appearance of a light pink color is expected. The reaction mixture will be stirred for 30 min; the precipitate obtained will be dried in an oven overnight at 80 °C. The nanocomposite of  $\text{TiO}_2\text{-Fe}_3\text{O}_4$  /Ag NPs (2.0% w/w of Ag),  $\text{AgNO}_3$  will be used as a source for  $\text{Ag}^+$  forming an ABC configuration summarized in figure 1 [5].

**Figure 1:** is a summary of the synthesis and design of the novel visible light catalyst for disinfection of laboratory and field water samples. (a) The top panel shows how the carbon nanotube network will align in one direction [z, x] and how this plane will effectively channel visible light to the metal (Fe) or silver (Ag) bound-carbon (BC) system. (b) The bottom center shows the photophysics of the proposed catalyst and how visible light is used to generate a local 'disinfecting environment' that is toxic to microorganism but not plants and the (c) left shows a computer-rendered model of how the three parts (metal, iron, and/or silver) and carbon nanotube network combined together to make a potent disinfectant. (d) The system will be evaluated against a common polyurethane (PU) filter, chlorination and boiling as standard methods.

Water samples will be collected from the local wastewater treatment facilities or coal power station or local landowner. If the power company or landowner wish to collect the samples themselves instead of having us to collect it, we will instruct them in procedures for sample bottle preparation, purging, sample filtering, sample storage, and sample preservation. Previously purified water will be incubated with two model microorganism (*Escherichia coli*, and *Paenibacillus lentus*)<sup>4</sup>, one model organic dye (methyl orange) and one model plant (*Arabidopsis thaliana*) seeds to investigate the efficacy of the CNN catalyst for disinfection and potential toxicity to plants based on the examination of seedlings from *A. thaliana*.

- A 250-mL filtered water sample preserved with nitric acid for cation and trace metal analyses, and
- A 250-mL filtered sample, unpreserved, for microbial analyses

<sup>4</sup> A Gram-negative (*E. Coli*) and Gram-positive (*P. lentus*) will be used, as they have the lowest biohazard risk to the graduate students if accidentally exposed, but biochemically will react in a very similar manner to their pathogenic strains. Most often the difference between a pathogenic and non-pathogenic strain is the ability of the pathogenic strain to generate and excrete a metabolite which is toxic to plants or animals, but the central cell wall biochemistry, morphology, and general cell operations are near-identical between the strains. The potency of CNN DAD agent on the more benign strains will be evaluated. Another goal is to demonstrate that in spite of its potency in the generation of ROS which causes microbial toxicity, this level is insufficient to cause toxicological harm to plants. A model plant will be grown from seeds and seedlings which will be compared and contrasted with untreated and treated plant seedlings to determine if there are any growth or developmental abnormalities.

### **Task 3 – Laboratory Analyses (Sajid Liu)**

Water quality samples will be assessed by comparing the results for each constituent with the primary drinking water standards (PDWS) established by the U.S. EPA [6].

*Evaluation of disinfection of microorganism:* The minimum bacterial concentration (MBC) will be established using filtration by PU filter as the positive control, using no treatment as a negative control, 10,000 parts-per-million (ppm) Clorox bleach solution, and 1 ppm of Fe/Ag-CNN. The samples will be inoculated with  $1 \times 10^8$  quantiles of *E.coli* and *P. lentus* and evaluated

to the logarithmic lowering of microorganism concentration by measurement of turbidity at 600 nm. The log ratio between the untreated sample with microorganism and treated samples at 1, 4 and 8 h will be plotted as a log reduction ( $L_n$ ) value. A value of  $L_6$  means that a concentration of  $1 \times 10^8$  colony forming units per mL of liquid (CFU/mL) was reduced to  $1 \times 10^2$  or 99.9999 % [7].

*Evaluation of decomposition of organic dye:* In a separate experiment that minimum decomposition concentration against 100 ppm of methyl orange will be conducted.

*Evaluation of non-toxicity against plant:* Twenty (20) *A. thaliana* seeds will be grown for three days in a petri dish with 0.8 % agar and MS media [Final concentrations in 500 mL containing 2.15 g of Murashige & Skoog Salts (MS media), 5g of 1% Sucrose (in water) and 0.25 g of 2-(N-morpholino) ethane sulfonic acid (MES) adjusted to a pH of 5.7 using potassium hydroxide (KOH)]. The morphology (stem length, leaf area, number of roots, the color of plant and general appearance) will be compared with seeds grown in the dark, in the light, half-dark, and half-light, and with and without 1, 10, and 100 ppm of Fe/Ag-CNN. In this manner, the development and any potential toxicity of the nano disinfectant to plant species can be considered [8].

*Evaluation of desalination of catalyst:* A desalination experiment will also be conducted using brine water which is slowly evaporated using FeCNN and compared to heating without a catalyst. To investigate the kinetics of desalting of brine water, a methodology described by Li *et al.*, [9] will be adopted and is shown in figure 2 below:

**Figure 2:** (a) Digital image of the carbon-based felt-based evaporator. (b) Schematic for the water flow process during evaporation with polyurethane (PU) Insulation form, (c) Schematic for evaporation experiment, where water evaporation per minute /per minute [second-order differential] without any treatment and with FeCNN is measured; and the steady-state evaporation rate for each cycle experiment. The effectiveness of Fe-CNN can thus be evaluated.

#### **Task 4 – Final Report (Amit Verma)**

A preliminary report will be submitted to STWA and Qatar Foundation by December 1, 2020, or earlier if the research is started earlier (anticipated start date September 01, 2019). The preliminary report will include a summary of the synthesis of CNN, laboratory analysis data for each water sample, and recommendation of use and application of nanocatalyst. STWA and Qatar Foundation will review and can request supplemental information within two weeks, post submission after which TAMUK will have two weeks to make the requested revisions [10]. If no

additional requests are made, the project will move into the final validation phase and a final report will be submitted in year two.

Timeline: Start of Project: September 01 2019

Preliminary Report Issue to QF and STWA: August 31, 2020

Request for Further information by September 15, 2020

Compliance by TAMUK by September 29, 2020

Final Report: August 31, 2021

### 3 Project Management (Amit Verma)

The proposed work will be supervised by Dr. Amit Verma, Professor of Computer Science & Electrical Engineering at TAMUK, with oversight by Dr. Mohamed Shibl associated with the Qatar Foundation and Qatar University. Dr. Verma has almost 20 years of experience supervising similar projects conducted by graduate students and has had projects funded by the Qatar Foundation. The day-to-day laboratory analysis work will be performed by a TAMUK graduate student, with additional lab supervision from Dr. Yaneth Gamboa, Laboratory Manager for the TAMUK Department of Engineering.

### 4 Performance Period (ALL)

The proposed scope of work will be completed between September 1, 2019, and August 31, 2021.

### 5 Budget and Justification (Amit Verma)

A total of \$97,514 is requested to cover the costs associated with the proposed scope of work (see attached budget spreadsheet). This total encompasses the following costs, summarized in Table 2:

<i>Table 2: Summary of TAMUK Supply Cost</i>	<i>Cost per Unit</i>
Dissemination of Project to organize an International Scientific Conference	\$ 513
Graduate Student Salary	\$ 2,205
Graduate Student Benefits	\$ 786
International Scientific Conference Fee for high caliber speaker(s)	\$ 1,503
(i) Sample bottles, glassware, and other storage containers	\$ 250
(ii) Cost of synthesis and laboratory analyses (SEM, TEM, XRD)	\$ 1,200
(iii) Argon gas for ICP-MS	\$ 250
(iv) IC consumables	\$ 135
(v) ICP-MS and IC Analytical standards	\$ 350
(vi) Filters, and Microscope Fee to TAMU College Station	\$ 220
(vii) Microorganism, dye, plant seed and reagent cost	\$ 235
Supplies (i-vii) -Sub-Total	\$ 2,640
Total Direct Costs	\$ 7,647
Indirect Costs	\$ 2,906
Total from STWA	\$ 10,553

**Budget Justification (Amit Verma)**

**Dissemination: \$513**

The project principal investigator, Dr. Amit Verma or team member, will be compensated for part-fee travel to the American Chemical Society to promote a Water Nexus Symposium and to supervise the overall project, which is equivalent to \$513.

**Graduate student salary: \$2,205**

One graduate student will be supported to perform synthesis, laboratory analyses, and poster presentation. It is estimated that the sampling analyses, microscope (ICPMS/SEM/TEM/XRD) analyses, data management, and conference presentation will require, on average, 1.9 work days of graduate student time per evaluation (this includes synthesis, characterization of CNN DAD, analytical method development and quality control procedures). The graduate students will be paid \$7.25 per hour (minimum wage), as calculated below:

$$\frac{1.9 \text{ work days}}{\text{test samples}} \cdot \frac{8 \text{ hrs}}{\text{work day}} \cdot \frac{\$7.25}{\text{hr}} \cdot \frac{20 \text{ tests}}{\text{project}} = \$2,205$$

**Graduate student benefits: \$786**

One graduate student will receive fringe benefits (workman's Compensation, Unemployment Compensation Insurance, and Leave Termination) at 2.3% of his/her salary.

$$\$2,205 \times 0.023 = \$51$$

The graduate student will be hired as a half-time research assistant for over 3½ months, which will make him/her eligible for health insurance at a rate of \$210/month.

$$\$210/\text{month} \times 3.5 \text{ months} = \$735$$

$$\$735 + \$51 = \$786$$

**Conference Fee: \$1,503**

This is to organize an International American Chemical Society Energy & Fuel Division Conference in 2020 (either May or August). Costs are requested for leaflet preparation, dissemination, coordination and partial payment for select speakers to promote the latest discovery related to energy, water, and the environment. We will also approach Springer Nature, to convert the symposium into a book or proceedings on water purification for the wider scientific community.

**Supplies: \$2,640**

It is estimated that a total of \$2,640 will be required for supplies, analyses, and synthetic chemicals and precursors. Required supplies include the following items summarized in **Table 3**:

<i>Table 3: Summary of TAMUK Supply Cost</i>	<i>Cost per Unit (\$)</i>
Sample bottles, glassware, and other storage containers	250
Cost of synthesis and laboratory analyses (SEM, TEM, XRD)	1,200
Argon gas for ICP-MS	250
IC consumables	135

ICP-MS and IC Analytical standards	350
Filters, and Microscope Fee to TAMU College Station	220
Microorganism, dye, plant seed and reagent cost	235

**Modified Total Direct Cost: \$7,647**

The “Modified Total Direct Cost” (MTDC) is the sum of the direct costs listed above.

**Indirect Cost: \$2,906**

The indirect cost (IDC) is 38% of the MTDC, or \$2,663 (=38% is the stipulated IDC rate in the agreement between TAMUK and the Department of Housing and Human Services).

**Total Cost: \$10,553**

The total cost is the sum of the MTDC and the IDC above. This will be requested from STWA and a separate \$70,938 (direct) plus \$16,907 as the (indirect cost (IDC)). The breakdown of total costs per entity is summarized in **Table 4** below.

**Table 4: Summary of cost breakdown between STWA and QF including percent of indirect**

#	Source	a: Direct	b: Indirect	% IDC c:[b / a] × 100 %	d:Total [a + b]	e: % total for STWA or QF [d <sub>1</sub> or d <sub>1</sub> / d <sub>3</sub> ] ×100
1	South Texas Water Authority (STWA)	\$ 7,647	\$ 2,906	38.0	\$ 10,553	~11
2	Qatar Foundation (QF)	\$ 70,938	\$ 16,907	23.8	\$ 87,845	~89
3	Combined	\$ 78,585	\$ 19,813	25.1	\$ 98,398	100

**Other benefits:**

The Qatar Foundation will be petitioned to allow one board member of the STWA to attend the confidential annual technical briefing in Qatar and to be allowed to meet with officials from كهرماء to learn best practices and also be briefed on parallel research conducted at Qatar University.

## Education

- 2001 – 2006      **Georgia Institute of Technology**, Atlanta, Georgia  
Ph.D. in Electrical and Computer Engineering
- 1999 – 2001      **Vanderbilt University**, Nashville, Tennessee  
Master of Science in Electrical and Computer Engineering
- 1993 – 1997      **Indian Institute of Technology-BHU** (formally Institute of  
Technology-BHU), Varanasi, India  
Bachelor of Technology in Electronics and Telecommunication  
Engineering

## Work Experience

- Fall 2012 –      Associate Professor, Department of Electrical Engineering, Texas A&M  
University – Kingsville, Kingsville, TX
- Fall 2006 – Fall 2012      Assistant Professor, Department of Electrical Engineering, Texas A&M  
University – Kingsville, Kingsville, TX
- Dec 2005 – May 2006      Postdoctoral fellow, UARC, NASA Ames Research Center, Moffett Field,  
CA
- 2001 – 2005      Research Assistant, School of Electrical and Computer Engineering, Georgia  
Institute of Technology
- 1999 – 2001      Research Assistant, Department of Electrical and Computer Engineering,  
Vanderbilt University
- 1997 – 1999      Process Automation Engineer and Senior Officer, Tata Iron and Steel  
Company, Jamshedpur, India
- 1996 – 1997      Undergraduate Research Assistant

## Research, Creative, and Scholarly Activity

### Funded Research

1. Comprehensive Investigation and Development of Silicon Nanowire Based Photovoltaic Technology  
Agency: Qatar Research Foundation  
Role: co-PI  
Amount: \$ 1,041,563  
Duration: 2012-2015
2. NUE: Nanoengineering Education in an Under-Represented Minority University.  
Agency: National Science Foundation  
Role: co-PI  
Amount: \$ 199,868  
Duration: 2011-2012 (2 years)
3. Device and Circuit Behavior Investigation of Small Diameter Nanowires  
Agency: TAMUK  
Role: PI  
Amount: \$24,957  
Duration: 2010-2011
4. Acquisition of Manual Probe System for Research and Education  
Agency: College of Engineering, TAMUK  
Role: PI  
Amount: \$ 24,000  
Duration: 2010 – 2011
5. Modeling of Organic Polymer-Carbon Nanotube Composites for Photovoltaic Applications  
Agency: College of Engineering, TAMUK  
Role: PI  
Amount: \$ 49,430  
Duration: 2010 – 2011
6. Circuit level behavior of single-wall carbon nanotube electronic and sensor devices  
Agency: TAMUK  
Role: PI  
Amount: \$27,389  
Duration: 2008-2009

## Personnel Profile

### Dr. Sajid Liu, Professor

**Undergraduate Work:** B.S. in Chemistry/Biochemistry

**Graduate Work:** M.S. in Fourier Transform Mass Spectrometry (FTMS) (1997) in Troy Wood's research group

**Doctoral Work:** Ph.D. in Matrix-assisted laser desorption/ionization time-of-flight (MALDI-TOF) Mass Spectrometry (2001) in Peter Derrick's research group. I was also a postdoctoral associate (PDA) at Cornell University working on plant proteomics (2001-2003) before my current position at Texas A&M University-Kingsville.

**Past Research:** M.A., SUNY Buffalo (1997) Ph.D., Warwick University (2001) P.D.A., Cornell University (2003) P.A., NTRC (2003)

**Current Research:** Matrix-assisted laser desorption/ionization time-of-flight mass spectrometry (MALDI-TOF MS) and nanoelectrospray ionization (nESI). Electro spray ionization coupled to quadrupole mass analyzer [LC-MS].  
Nanoelectrospray ionization coupled to hybrid-quadrupole mass time-of-flight analyzer [LC-MS/MS]

**Courses in Spring 2012**

**Attachments:** STWA+QF\_FINAL\_2.docx

**Importance:** High

Ms. Serrato,

First of all, please let me say thank you for your service to this community, I really appreciate your light touch on this document. I wish we had more leaders following your example.

Dr. Verma will be present, my secretarial duties for the American Chemical Society, mean I will be working the conference, but I will sneak myself into one of the empty conference rooms and listen in and chime-in if a technical question is posed.

As I said in an earlier communication, we are not looking at hard dollars (although assistance would be appreciated) but an understanding of a payment-in-kind (PIK) which we could translate into equivalent dollars. This PIK can show solidarity between our proposal and the community for dissemination of research and outreach and would also be favorably viewed by the Qatar Foundation

We do have a track record of innovative research, last year we developed a new type of fingerprint agent, that has never been developed before to help our homicide division from gathering old latent fingerprints to solve crimes.

We now turn our focus to nanomaterials for water purification. The big Four D [disinfection, decomposition, decontamination and desalination].

Again to my knowledge there is no single agent that can do all four, but I believe we can do it with a little help from our friends.

Respectfully,

Saj

Dr. Liu,

First, please call me Carola. Although I am Executive Director, my title would be Ms. Serrato if you are uncomfortable referring to me by my first name.

I have reviewed the revised proposal and there are still a few questions – again, I hope my writing is legible. The STWA agenda and packet are posted/emailed this Friday. However, it would be very helpful to have the final draft by tomorrow in the early afternoon.

Thank-you,  
Carola

Carola G. Serrato

**Subject:** RE: NPRP (83)  
**Importance:** High

Director Serrato,

Thank you for your kind efforts, we all appreciate your assistance. The Qatar Foundation project is an opportunity which I believe can assist our local communities and potentially businesses. We will also try and work with our PTAC and see if we can bring investment dollars from Qatar to South Texas. Currently, they have a project which requires disinfection and desalination to be performed in a seamless manner. To my knowledge this has never been done. To demonstrate that we have local support beyond our university, Dr. Verma suggested we approach you and due to the tireless efforts of Brandon Barrera, we are at this juncture.

Simply put, we are seeking some type of payment-in-kind which we can then leveraged with the Qatar Foundation and get research dollars to the university and if we complete this project successfully, bring research dollars to our communities. We also like to import or export our best practices as far as water purification is concerned as the Gulf Kingdom of Qatar and us in the Gulf share a similar issue. Too much sun, too much salt and not enough drinking or lawn water. If you own a house with a water softener system, you will know it is not a onetime cost.

I have made the revisions and Dr. Verma would be happy to meet at your earliest convenience. As secretary of the American Chemical Society, Energy & Fuels Division, I will be attending part of the conference related to its organization next week and most likely will not be here, having said this, Dr. Verma is here and this project is too important to be delayed by any single individual.

I want to thank you for your kind consideration, patience and your time and am willing to make accommodations you feel are appropriate to the technical report above.

Respectfully submitted

Sajid Liu, CSci CChem, FRSC, Ph.D (Wariwck U 01), PDA (Cornell U 03)

**Cc:** Frances Rosales  
**Subject:** RE: NPRP (41)  
**Attachments:** AgriLife-HST Private Water Well Screening Proposal 08\_29\_18 \_ FINAL.docx

Mr. Barrera:

I would be glad to meet with Dr. Verma and/or Dr. Liu on this matter. However, attached is the type of proposal that the STWA Board has reviewed in the past regarding a request for water related studies. As you can see, the attached proposal has significantly more detail than Dr. Liu's email. The Board still had several questions after reviewing the attached proposal.

After reviewing the email (several times), I have a number of suggestions to make the description more user friendly and very likely answer the type of questions that the Board has posed when reviewing past requests. Some specific examples are as follows:

- There are terms that should be defined. For example, what is a nano-system? (It appears, according to Dr. Verma's curriculum vitae, that Dr. Verma has devoted many years of his career to nano technology.)
- Other terms include conserved cell wall, macromolecule metabolic process, Erythromycin methyltransferases, AcrAB, RND efflux systems, membrane disassembly, and unzipping of DNA. For my own understanding, is "resistant antibiotics microorganism" the same as an antibiotic resistant microorganism?
- The "Laymans Summary" contains terms that would also need to be defined such as "photocatalytic." In addition, is "-omic analysis" intended to cover several types of analyses that end in "omic"?
- The email has a section entitled "YOUR ROLE" that would need to be much more specific. For example, the number of samples and location of samples would need to be detailed. Clarification would be needed on the "unpaid internship" and the "water plant" items. If the intern is unpaid, what would the funds cover? Which "water plant" is being considered? I noticed that the email referred to the "Kingsville water board"; is it possible that Dr. Verma thinks STWA operates City of Kingsville ground water wells?
- The email also has a section entitled "YOUR BENEFITS." Since STWA purchases treated water from the City of Corpus Christi, it is uncertain whether the STWA Board would consider having access to a chemical agent would be advantageous. However, if the proposal is suggesting that this chemical agent could be used on a large scale for a Water Treatment Plant such as ON Stevens thereby reducing costs or improving water quality at a reasonable cost, then that type of description would be needed.
- Finally, I started to research the Qatar Foundation listed in the "ACTION" section of the email. I did a very cursory internet search. I believe details on this Foundation would need to be included if the study is contingent on getting Foundation funding. Information on Dr. Verma, Dr. Liu and any graduate students would also be needed in the proposal.

The agenda and Board packet for the March 26<sup>th</sup> meeting will be developed next week. I would be glad to introduce this subject as a preliminary request.

Carola

Carola:

I was approached by Dr. Amit Verma from TAMUK and asked if there was any way that we could assist him and his colleague Sajid in a research project they are working. The project is in regards to water purification. Bellow is the email that I was sent by Sajid Liu a graduate student from TAMUK.

Would it be possible to set up a meeting with the two to see if there is anything that we might be able to do to help?

Thank you,

Brandon

**To:** Amit Verma <[Amit.Verma@tamuk.edu](mailto:Amit.Verma@tamuk.edu)>; brandon.barrera2015@yahoo.com <[brandon.barrera2015@yahoo.com](mailto:brandon.barrera2015@yahoo.com)>  
**Sent:** Friday, March 15, 2019, 12:47:04 AM CDT  
**Subject:** NPRP (41)

Dear Brandon,

**PROBLEM:** Clean water is critical to life and is generated by filtration and disinfection of potable water, which is costly in terms of energy and resources. If the water source has saline, the water needs to undergo reverse osmosis to remove salt. In addition, the water source may contain antibiotic resistant bacteria as well as organic compounds. We propose two nano-systems to purify water and to understand the biochemistry of antibiotic resistance to ensure the microorganism do not become resistant to our proposed nanosystem.

**SOLUTION:** We propose a bifunctional Au@TiO<sub>2</sub> core-shell nanoparticle film [Au NP] purification of seawater and a metal-free carbon nanodot -hybridized protonated graphene with carbon nitride [gC<sub>3</sub>N<sub>4</sub>] quantum dots (gCDs) for degradation of Methyl Orange and drug-resistant Escherichia coli (E. coli) and Staphylococcus aureus (S. aureus).

**HYPOTHESIS:** Disinfection of resistant antibiotics microorganism is via membrane disassembly and unzipping of deoxyribonucleic acid (DNA) using the oxygen reactive species such as hydroxyl radical

**APPROACH:** Through expected morphological changes in E. coli and S. aureus, the possible mechanisms for drug resistance will be examined for bacterial damage caused by our nano-disinfectants. Gene expression profiling methods, such as (23S) rRNA or RNA sequencing, will be used to predict discover mechanisms of toxicity of nano-disinfectants. Gene ontology (GO) assay analyses will be used to demonstrate the molecular mechanism of the antibacterial effect of Au NPs or gQDs. Cellular component ontology, will be applied to understand if Au NP or gCDs disrupt cell wall organization or biogenesis or conserved cell wall macromolecule metabolic process leading to inactivation and whether these processes are activated related to erythromycin (Erm) methyltransferases, AcrAB or RND efflux system with Au NPs or gCDs relative to common antibiotics like tetracycline

**LAYMANS SUMMARY:** The present study incorporating synthesis and -omic analysis will offer novel insights into the molecular mechanism of antibacterial resistance of potential pathogenic microorganism in water, as well as offering a general photocatalytic system for purification of polluted water.

**YOUR ROLE:** Payment-in-kind (PIK) involving  
(i) water samples which contain certain pollutants for us to evaluate

(ii) Possible unpaid Internship for one graduate to work in the water plant

(iii) If funds become available transfer the unpaid internship to a paid internship coupled with laboratory based research at Texas A&M university-Kingsville

**YOUR BENEFITS:** Access to a chemical agent that will purify water of harmful organics and microorganism using visible light and if coupled to a solar cell, can desalt water using evaporation. This is cheaper, easier to use, avoid application of bleach with associated sensitization risk of employee and links the university and the community together.

**ACTION:** A conditional letter of support offering support if proposal is funded by the Qatar Foundation and (b) discretionary funds are available by your organization.

Saj

**Subject:** RE: NPRP (64)  
**Attachments:** TAMUK Proposal Nanotube Network Draft.pdf

Dr. Liu:

I read through the proposal several times and there were a number of questions/comments/corrections that I thought should be brought to your attention since the STWA Board will be provided with your final draft as part of the March 26 Board Meeting agenda packet. These are noted in the attached pdf file with my hand written notes. I hope the notes are legible. Also, I offer my apologies in advance if the comments are as a result of the proposal being written in a particular science paper format that I am unfamiliar with. Nonetheless, there were several questions that seemed to be repeated and warrant pointing out as well as reference to the City of Corpus Christi and local practices:

1. The proposal seems to indicate that the samples will be from wastewater discharges of municipal and industrial (power generating company) outfalls. However, in other sections of the proposal, it appears to refer to groundwater well sources. Are all of these sources to be sampled?
2. There is reference to a chemical that would be available to STWA for treatment. STWA purchases treated water from the City of Corpus Christi. I want to clarify that South Texas Water Authority only boosts the chloramine residual.
3. On page 2, there is reference to the City of Corpus Christi and what I believe was intended to be boil water notices ["boiling warming"]. The City of Corpus Christi's boil water notices were as a result of low chloramine residuals in the far reaches of their distribution system. The City has addressed this issue by the addition of chlorine dioxide - in April of 2017. There has not been another incident since that time.
4. At the bottom of page 2/top of page 3, there is reference to landowners and golf resorts using Gulf waters "to water soil and lawns..." I am not familiar with this practice in the Coastal Bend Region. Private residents and golf courses have used treated municipal wastewater in the past. But, I have not seen any reports that indicate a build-up of salt in soils due to this type of irrigation. A quick internet check shows that a grass called seashore paspalum is used at some golf courses. Again, if there are any golf courses in the Coastal Bend Region irrigating with Gulf waters it would be interesting to know about this – not just for this proposal but also in my role as Co-chair of the Coastal Bend Regional Water Planning Group. BTW, is salinization of the soil the same as "salt inclusion?"

Finally, your email below refers to providing a letter prior to March 26<sup>th</sup>. The STWA Board meets on that day and the earliest a letter could be provided would be after that Board meeting.

Please let me know if I need to clarify any of my handwritten notes.

Carola G. Serrato  
Executive Director

Dear Brandon,

Here is a proposal modelled on the template. If you can confer and get us a provisional letter of support before the 26<sup>th</sup> of March, that would be awesome, but we can use that to strengthen our request of funds in Qatar. Since your support is contingent on us getting funds from Qatar, I see no downside as there are no binding commitments until we secure support from Qatar.

As far as I am aware this is the first proposed use of a nanocatalyst for water disinfection, desalination and decolourisation with potential for heavy metal ion removal that is not a filter. The letter also opens the pipeline between exchange between STWA (TX) and KAHRAMAA (Qatar).

Respectfully,

Sajid

ATTACHMENT 17

Annexation Petitions

## Memorandum

To: South Texas Water Authority Board of Directors  
From: Carola G. Serrato, Executive Director  
Date: March 22, 2019  
Re: Annexation Petitions – Five (5) Additional Cyndie Park 2 Subdivision Petitions – Set Time/Date for Public Hearing

### Background:

As reported in a recent Weekly Update, on behalf of the Nueces Water Supply Corporation (NWSC), several staff attended a Cyndie Park 2 Water Supply Corporation meeting as a means to collect the necessary documents (NWSC Service Agreement and Annexation Petition) to complete the paperwork process. As the Board is aware, a property owner living outside of South Texas Water Authority's (STWA) district boundaries will request retail water service from the Nueces Water Supply Corporation (NWSC) and is then required to request annexation into STWA's district. This results in the new NWSC member paying the same costs as all other NWSC customers, specifically their NWSC retail water bill and property taxes to STWA.

As reported and discussed previously, the Nueces County Grant Department has secured grant funds to extend water service to the Cyndie Park area in order to eliminate use of the CP2WSC's groundwater well which contains arsenic that exceeds the Maximum Contaminant Level (MCL). The latest milestone in this long-term project is the advertisement for bids for the construction of the new Banquette Pump Station. The bid opening is scheduled for April 5, 2019.

With the execution of a Bill of Sale, NWSC will be accepting the CP2WSC service area as approved by the Texas Public Utility Commission (TPUC). Staff had hoped, by this juncture, to have the proper paperwork from approximately twenty (20) active CP2WSC customers owning property in the Cyndie Park 2 subdivision – there are about another five (5) customers serviced by CP2WSC owning property in the Cyndie Park 1 subdivision and The Ranch subdivision. However, legal counsel has recommended and the NWSC Board has agreed to begin serving the area despite without all accounts' documents in hand. This will require additional efforts to collect the documents. Ultimately, a third letter will be sent followed by a disconnection notice with a set deadline.

### Analysis:

The five (5) enclosed petitions brings the total to eight (8) Cyndie Park 2 Subdivision property owners that have filed their necessary paperwork. This is a two-step process. This first step sets the time and date for the public hearing and allows for the publication of the required notice. The public hearing will be prior to the April Board meeting.

### Staff Recommendation:

Adopt Resolutions 19-16 through 19-20.

### Board Action:

Determine whether to adopt Resolutions 19-16 through 19-20.

### Summarization:

Accepting the petitions and publishing notice of a hearing date and time, enables the landowner to receive service and provides uniformity between all NWSC members.

ATTACHMENT 18

Resolution 19-16

SOUTH TEXAS WATER AUTHORITY

Resolution 19-16

RESOLUTION OF DETERMINATION OF VALIDITY OF ANNEXATION PETITION,  
SETTING PUBLIC HEARING AND AUTHORIZING PUBLICATION OF NOTICE.

WHEREAS, Crystal Lynn Barrera (Petitioner), has filed the attached petition (the Petition) with the South Texas Water Authority requesting annexation of her property into the South Texas Water Authority in order to allow water service to her property to be provided by Nueces Water Supply Corporation, and

WHEREAS, the South Texas Water Authority Board of Directors has reviewed the Petition and finds that it meets all of the requirements for annexation into the South Texas Water Authority's District, and

WHEREAS, the Board of Directors hereby sets a public hearing to hear evidence for or against the proposed annexation of this property to be held on April 23, 2019 at 5:30 p.m. at the South Texas Water Authority, 2302 East Sage Road, Kingsville, Texas.

NOW, THEREFORE, BE IT RESOLVED that the Board of Directors of the South Texas Water Authority hereby authorizes the publication of the attached Notice of Public Hearing on Annexation for a public hearing to be held on April 23, 2019 at 5:30 p.m. at South Texas Water Authority, 2302 East Sage Road, Kingsville, Texas. At such hearing all interested persons may appear and offer evidence for or against the proposed annexation of the property described in Exhibit A of the Petition.

Duly adopted this 26th day of March, 2019.

\_\_\_\_\_  
KATHLEEN LOWMAN, PRESIDENT

ATTEST:

\_\_\_\_\_  
RUDY GALVAN, JR., SECRETARY/TREASURER

PETITION FOR ADDITION OF CERTAIN LANDS TO  
THE SOUTH TEXAS WATER AUTHORITY

STATE OF TEXAS :  
COUNTY OF NUECES :

TO THE BOARD OF DIRECTORS OF THE SOUTH TEXAS WATER AUTHORITY:

The undersigned (herein called "Petitioner"), holder of title to the territory described by metes and bounds in Exhibit "A" which is attached hereto and incorporated herein for all purposes, being all of the residents and landowners of such territory, as shown by the tax rolls of Nueces County, Texas, and acting pursuant to the provisions of Section 11006.052, Special District Local Laws Code, respectfully petitions the Board of Directors of South Texas Water Authority that the territory described by metes and bounds in Exhibit "A" be added to and become a part of the established South Texas Water Authority, and in support of this petition would show as follows:

I.

Fee simple title and full ownership of the aforesaid territory, which lies wholly within Nueces County, Texas, is vested in Petitioner.

II.

The addition of said territory to South Texas Water Authority is feasible and practical, would be to the best interest both to the territory and to the Authority and would benefit said territory.

III.

The Authority will be able to supply water, or have water supplied, to the added territory.

IV.

This petition shall constitute an election on the part of the Petitioner, its successors and assigns, for the aforesaid land and any improvements which may be constructed thereon to become liable for all present and future debts of the Authority in the same manner and to the same extent as other lands and improvements in the Authority are liable for the Authority's debts.

V.

Petitioner hereby authorizes the Board of Directors of the Authority to levy taxes and set rates sufficient to pay their share of the aforementioned outstanding indebtedness.

WHEREFORE, Petitioner prays that this petition be properly filed, as provided by law; that the Board of Directors of South Texas Water Authority hear and consider the petition in keeping with the provisions of Section 11006.052, Special District Local Laws Code and that this petition in all things be granted and that the territory described in Exhibit "A" be added to and become a part of the established South Texas Water Authority; that after this petition is granted the Board's order thereon be filed of record and be recorded in the Deed Records of Nueces County, Texas; and that the area described in Exhibit "A" be thereafter a component part of South Texas Water Authority.

PETITION FOR ADDITION OF CERTAIN LANDS TO  
THE SOUTH TEXAS WATER AUTHORITY

Property Description:

MANTOR BRIGGS-KUYKENDALL out of lot 25, aka Cyndie Park Unit 2 Tract Twenty-Seven (27) and Southwest Quarter (SW/4) of Tract Twenty-eight (28), being a tract of land containing 0.80 acres more or less, in Nueces County Texas.

NOTICE OF PUBLIC HEARING ON ANNEXATION

THE STATE OF TEXAS  
SOUTH TEXAS WATER AUTHORITY

Pursuant to a Resolution adopted by the Board of Directors of South Texas Water Authority, a hearing shall be held at the South Texas Water Authority, 2302 East Sage Road, Kingsville, Texas, on April 23, 2019 at 5:30 p.m. with respect to the Petition filed by Crystal Lynn Barrera for annexation of the territory described below, on the question of whether the territory sought to be annexed will be benefited by the improvements, works, and facilities then owned or operated or contemplated to be owned or operated by the Authority or by the other functions of the Authority. All interested persons may appear at such hearing and offer evidence for or against the proposed annexation.

Signed this the 26th day of March, 2019.

Kathleen Lowman, President  
Board of Directors  
South Texas Water Authority

That certain lot or tract of land situated in Nueces County, Texas, and more particularly described as follows:

MANTOR, BRIGGS-KUYKENDALL out of lot 25, aka Cyndie Park Unit 2 Tract Twenty-Seven (27) and Southwest Quarter (SW/4) of Tract Twenty-eight (28), being a tract of land containing 0.80 acres more or less, in Nueces County, Texas.
